**Re: Change Order  
Dry Cleaner Site Investigation  
1509 Elm Street  
Boscobel, Wisconsin**

Dear Ms. Hanefeld:

On behalf of Mound City Bank, Seymour Environmental Resources, Inc. (Seymour) is requesting and additional \$6,555 to install six geoprobe borings. The additional work was recommended in a previously submitted Investigation Update. I have attached a copy of that correspondence for your convenience. We propose to install geoprobe borings to avoid placing more monitoring wells than are necessary. The two piezometers that we installed have not had any volatile organic compounds detected to date. Additionally no significant downward gradient has been documented. Therefore, we feel that geoprobe borings are appropriate at this point in the investigation.

Please call me at 608-838-9120 if you have any questions or would like additional information.

Sincerely,  
**Seymour Environmental Services, Inc.**

Robyn Seymour, P.G.  
Hydrogeologist
