<u>DOCUMENTS NEEDED</u>					
Closure Letter, and any conditional closure letter issued or denial letter issued.					<input checked="" type="checkbox"/>
Copy of most recent deed, including legal description, for all affected properties					<input checked="" type="checkbox"/>
Certified survey map or relevant portion of the recorded plat map (if referenced in the legal description) for all affected properties					<input checked="" type="checkbox"/>
County Parcel ID number, if used for county, for all affected properties					<input checked="" type="checkbox"/>
Location Map which outlines all properties within contaminated site boundaries on USGS topographic map or plat map in sufficient detail to permit the parcels to be located easily (8.5x14" if paper copy). If groundwater standards are exceeded, the map must also include the location of all municipal and potable wells within 1200' of the site.					<input checked="" type="checkbox"/>
Detailed Site Map(s) for all affected properties , showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. (8.5x14", if paper copy) This map shall also show the location of all contaminated public streets, highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding ch. NR 140 ESs and soil contamination exceeding ch. NR 720 generic or SSRCLs.					<input checked="" type="checkbox"/>
Tables of Latest Groundwater Analytical Results (no shading or cross-hatching)					<input type="checkbox"/>
Tables of Latest Soil Analytical Results (no shading or cross-hatching)					<input checked="" type="checkbox"/>
Isoconcentration map(s), if required for site investigation (SI) (8.5x14" if paper copy). The isoconcentration map should have flow direction and extent of groundwater contamination defined. If not available, include the latest extent of contaminant plume map.					<input type="checkbox"/>
GW: Table of water level elevations, with sampling dates, and free product noted if present					<input type="checkbox"/>
GW: Latest groundwater flow direction/monitoring well location map (should be 2 maps if maximum variation in flow direction is greater than 20 degrees)					<input type="checkbox"/>
SOIL: Latest horizontal extent of contamination exceeding generic or SSRCLs, with one contour					<input checked="" type="checkbox"/>
Geologic cross-sections, if required for SI. (8.5x14" if paper copy)					<input type="checkbox"/>
RP certified statement that legal descriptions are complete and accurate.					<input checked="" type="checkbox"/>
Copies of off-source notification letters (if applicable)					<input type="checkbox"/>
Letter informing ROW owner of residual contamination (if applicable)(public, highway or railroad ROW)					<input type="checkbox"/>
Copy of (soil or land use) deed restriction (s) or deed notice if any required as a condition of closure					<input type="checkbox"/>
Copy of any maintenance plan referenced in the deed restriction					<input type="checkbox"/>

RE: **Final Closure**

Commerce # 54868-2917-21 DNR BRRTS # 03-03-543961
Kwik Trip #749, 1821 Main St, Rice Lake

Dear Mr. Batzel:

The Wisconsin Department of Commerce (Commerce) has reviewed the request for case closure prepared by your consultant, Braun Intertec Corp, for the site referenced above. Commerce has determined that this site does not pose a significant threat to the environment and human health. No further investigation or remedial action is necessary.

This site is now listed as "closed" on the Commerce database. This letter serves as your written notice of "no further action." Timely filing of your final PECFA claim (if applicable) is encouraged. If your PECFA claim is not received within 120 days of the date of this letter, interest costs incurred after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

It is in your best interest to keep all documentation related to the environmental activities at your site. If residual contamination is encountered in the future, it must be managed in accordance with all applicable state and federal regulations. If it is determined that any remaining contamination poses a threat, the case may be reopened and further investigation or remediation may be required.

Thank you for your efforts to protect Wisconsin's environment. If you have any questions, please contact me in writing at the letterhead address or by telephone at (608) 261-7718.

Sincerely,

Will M. Myers
Geologist
Site Review Section

BARRON COUNTY CERTIFIED SURVEY MAP NO.

PART OF OUTLOTS 254 & 255 OF THE BANISTER PLAT TO THE CITY OF RICE LAKE, LOCATED IN THE SW 1/4 OF THE SE 1/4 OF SECTION 28, T35N, R11W, BARRON COUNTY, WISCONSIN.

MAP # 2511

18 2

SURVEYOR'S CERTIFICATE

I, Roy E. Williams, Registered Land Surveyor, hereby certify that I have surveyed, divided and mapped part of Outlots 254 and 255 of the Banister Plat to the City of Rice Lake, located in the SW 1/4 of the SE 1/4 of Section 28, T35N, R11W, Barron County, Wisconsin, said parcel described as follows:

Commencing at the SE corner of Lot 1 of Certified Survey Maps vol. 13, page 110; thence S 89° 44' 07" E, 108.99 feet along the north line of Outlot 254 to the east right-of-way of Main Street (a.k.a. CTH "SS") and the point of beginning;

thence continuing S 89° 44' 07" E, 217.18 feet along the north line of Outlot 254; thence continuing along said north line S 88° 48' 09" E, 334.33 feet to the NE corner of Outlot 254; thence S 0° 22' 29" W, 230.90 feet along the east line of Outlot 254 to the SE corner of said Outlot 254; thence N 89° 17' 03" W, 395.41 feet along the south line of Outlot 254 to the NW corner of a parcel of land recorded in Record's vol. 445, page 353; thence S 0° 14' 17" W, 90.86 feet along the west line of said parcel recorded in Record's vol. 445, page 353 to the NE corner of a parcel of land recorded in Record's vol. 426, page 679; thence N 89° 20' 33" W, 325.00 feet along the north line of said parcel recorded in Record's vol. 426, page 679 to the east right-of-way line of Main Street; thence N 29° 57' 05" E, 104.53 feet along said east right-of-way to the south line of Outlot 254; thence N 29° 19' 49" E, 81.45 feet along said east right-of-way; thence continuing along said east right-of-way and along the arc of a curve concave to the northwest whose chord bears N 26° 17' 27" E, 177.80 feet to the point of beginning;

said parcel subject to easements of record;

that such map is a correct representation of all the exterior boundaries of the land surveyed and subdivision thereof made;

that I have made such survey, land division and certified survey by the direction of Mr. Romaine Quinn;

that I have fully complied with the provisions of Chapter 236.34 of the Wisconsin Statutes and the subdivision regulations of the City of Rice Lake and the County of Barron in surveying, dividing and mapping the same.

Re: Geographic Information System Registry for the Kwik Trip Store # 749, 1821 Main Street,
Rice Lake, Wisconsin – WDNR BRRTS # 03-03-543961

Regulatory file closure has been requested for the above referenced site. Petroleum impacted soil exceeding Wisconsin Department of Natural Resources (WDNR) NR-720 generic residual contaminant levels (RCLs) may be still be present beneath the site. Therefore, pursuant to WDNR ch. NR 726, the required Geographic Information System (GIS) registry information must include legal descriptions and/or plat maps. Legal descriptions and/or plat maps must be included for all properties (within or partially within the site's boundaries), which have soil contamination that exceeds the RCLs and/or groundwater contamination that exceeds the ESs at the time closure is requested. Additionally, the GIS registry information must include a statement signed by the responsible party, which states that he or she believes that the legal description has been attached for each property that is within, or partially within, the contaminated site boundary. (The purpose of this requirement is that a legal description for each of the contaminated properties has been submitted. The responsible party is not required to attest to the accuracy of the attached legal descriptions.) Therefore, the following statement has been included:

I, Troy Batzel, representing Kwik Trip, Inc., certify that to the best of my knowledge the legal description has been attached for each property that is within, or partially within, the contaminated site boundary for the Kwik Trip Store # 749 site.

Dear Ms. Kazda:

Re: Geographic Information System Registry for Kwik Trip Store #749
1821 Main Street
Rice Lake, Wisconsin
WDNR BRRTS # 03-03-543961.

Attached is the required GIS soil registration fee (\$200.00) for the above referenced site.

Regulatory file closure is being requested for the above referenced site. Petroleum impacted soil exceeding Wisconsin soil standards may still be present beneath the site. Therefore, pursuant to WDNR ch. NR 726, the required Geographic Information System (GIS) registry information for the referenced site has been submitted to Mr. Will Myers with the Wisconsin Department of Commerce.

If you have questions or require further information, please contact me at 608.781.7277.

Sincerely,

BRAUN INTERTEC CORPORATION

Mark Gretebeck
Project Manager

Dear Mr. Schultz:

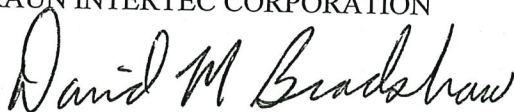

Re: Case File Transfer Request
Kwik Trip Store# 749
1821 Main Street
Rice Lake, Wisconsin
BRRTS#: 03-03-543961

On August 29, 2005, a piping and dispenser upgrade for the underground storage tank (UST) system was completed at Kwik Trip Store #749, 1821 South Main Street, Rice Lake, Wisconsin. Impacted soil encountered beneath dispenser islands and piping (107.09 tons) was removed from the site and taken to Waste Management's Timberline Trail Landfill Recycling and Disposal Facility in Weyerhaeuser, Wisconsin. Twelve confirmatory samples were collected below the piping runs and dispensers. Four additional samples were collected from the soil stockpiles. The gasoline range organics (GRO) and petroleum volatile organic compounds (PVOC) analytical results from these confirmatory samples indicate the impacted soils were effectively removed except for the area of ST-4. Concentration of toluene, total xylenes and GRO in the ST-4 soil sample were greater than the WDNR NR 720 residual contaminant levels (RCLs).

Based on the depth of the residual impacted soil (greater than 4 feet) and the impervious surface above, the direct contact risk is likely minimal and therefore additional investigation and/or remedial activities are not warranted. No further action is recommended for this site. Braun Intertec recommends requesting regulatory file closure for the referenced site. Regulatory file closure will include registering the site on the WDNR soil geographical information system database, which was completed in January of 2006. The site does not have any risk factors that would keep the file under the jurisdiction of the WDNR. **Therefore, the WDNR is requested to transfer the case file to the Wisconsin Department of Commerce as soon as possible.** The Case Summary and Close-out Form and related documentation will be submitted directly to the Department of Commerce.

If you have questions or require further information, please contact David Bradshaw or Mark Gretebeck at 608.781.7277 or dbradshaw@braunintertec.com.

Sincerely,
BRAUN INTERTEC CORPORATION

Dear Mr. Batzel:

The Department of Natural Resources (DNR) - Remediation and Redevelopment (R & R) program has recently received correspondence from your consultant regarding the above-referenced case.

The State of Wisconsin divides the jurisdiction for sites contaminated by petroleum storage tank systems between the DNR and the Department of Commerce (Commerce). This is based on statutory definitions of high, medium and low risk sites. Under this statute, oversight of sites falling under the definition of "low or medium risk" are the responsibility of Commerce rather than our agency.

Your consultant has advised us that your site should be classified as "low or medium risk." As such, further reviews of submittals and all technical assistance will need to be provided by staff at Commerce. The case files for this site, therefore, are being transferred to Will Myers at the Department of Commerce. The phone number is 608-261-7718. Please address all future inquiries to the Department of Commerce.

If you have any questions regarding this letter, please contact me at 715-365-8990.

Sincerely,
NORTHERN REGION

Bill, I am trying to find out how to get the file for the above referenced site (Kwik Trip, store# 749, Rice Lake, WI) transfer from WDNR to the Department of Commerce. We have been in contact with Mr. Will Myers, of DOC, and he has let us know that we need to formally transfer jurisdiction of this site from WDNR to the Department of Commerce before we could proceed with closure of this site. Will an e-mail request be adequate or do we need to submit this request via a formal letter? Please let me know and we will proceed accordingly. If you have any question please contact myself or Mark Gretebeck at (608)781-7277

Re: Site Closure Request for Kwik Trip Store #749
1821 South Main Street
Rice Lake, Wisconsin
WDNR BRRTS # 03-03-543961

Dear Mr. Myers:

On August 29, 2005, a piping and dispenser upgrade for the underground storage tank (UST) system was completed at Kwik Trip Store #749, 1821 South Main Street, Rice Lake, Wisconsin. Impacted soil encountered beneath dispenser islands and piping (107.09 tons) was removed from the site and taken to Waste Management's Timberline Trail Landfill Recycling and Disposal Facility in Weyerhaeuser, Wisconsin. The soil disposal documentation is included in Attachment A. Twelve confirmatory samples were collected below the piping runs and dispensers. Four additional samples were collected from the soil stockpiles. The gasoline range organics (GRO) and petroleum volatile organic compounds (PVOC) analytical results from these confirmatory samples indicate the impacted soils were effectively removed except for the area of ST-4. Concentration of toluene, total xylenes and GRO in the ST-4 soil sample were greater than the WDNR NR 720 residual contaminant levels (RCLs).

Based on the depth of the residual impacted soil (greater than 4 feet) and the impervious surface above, the direct contact risk is likely minimal and therefore additional investigation and/or remedial activities are not warranted. No further action is recommended for this site. However, petroleum impacted soil exceeding the RCLs may still be present beneath the site. Therefore, pursuant to WDNR ch. NR 726, the required Geographic Information System (GIS) registry information for the referenced site is included in Attachment B. Additionally, attached is the required GIS soil registration fee (\$200.00).

If you have questions or require further information, please contact me at 608.781.7277.

Sincerely,

BRAUN INTERTEC CORPORATION

Case Summary

A chronological summary of site investigation and remediation activities at the Kwik Trip Store #749 site is as follows:

On August 29, 2005 a piping and dispenser upgrade for the underground storage tank (UST) system was completed at the site. Impacted soil was encountered beneath dispenser islands and piping was removed from the site (107.09 tons) and taken to Waste Management's Timberline Trail Landfill Recycling and Disposal Facility in Weyerhaeuser, Wisconsin. Thirteen soil samples (ST-1 through ST-13) were collected from beneath dispenser islands and screened in the field for the presence of organic vapors with a photoionization detector (PID). Sixteen soil samples collected from the soil stockpiles were also collected and screened for the presence of organic vapors. Elevated PID readings (greater than 10 ppm) were recorded from soil samples ST-4, ST-6 and ST-7 collected at various depths ranging from 3 to 6 feet below ground surface (bgs), and were analyzed for petroleum volatile organic compounds (PVOCs) and gasoline range organics (GRO). Some petroleum constituents were detected in the ST-1 and ST-4 soil samples at concentrations greater than the method detection limits. Toluene and total xylenes were detected in soil sample ST-4 at a concentration greater than the Wisconsin Administrative Code, Chapter NR720, Residual Contaminants Level (RCL). Additionally, GRO was detected in soil sample ST-4 at concentrations greater than the RCL. Soil laboratory analytical results are summarized in Table 2.

Evaluation of Wisconsin Administrative Code COMM47.337 environmental factors

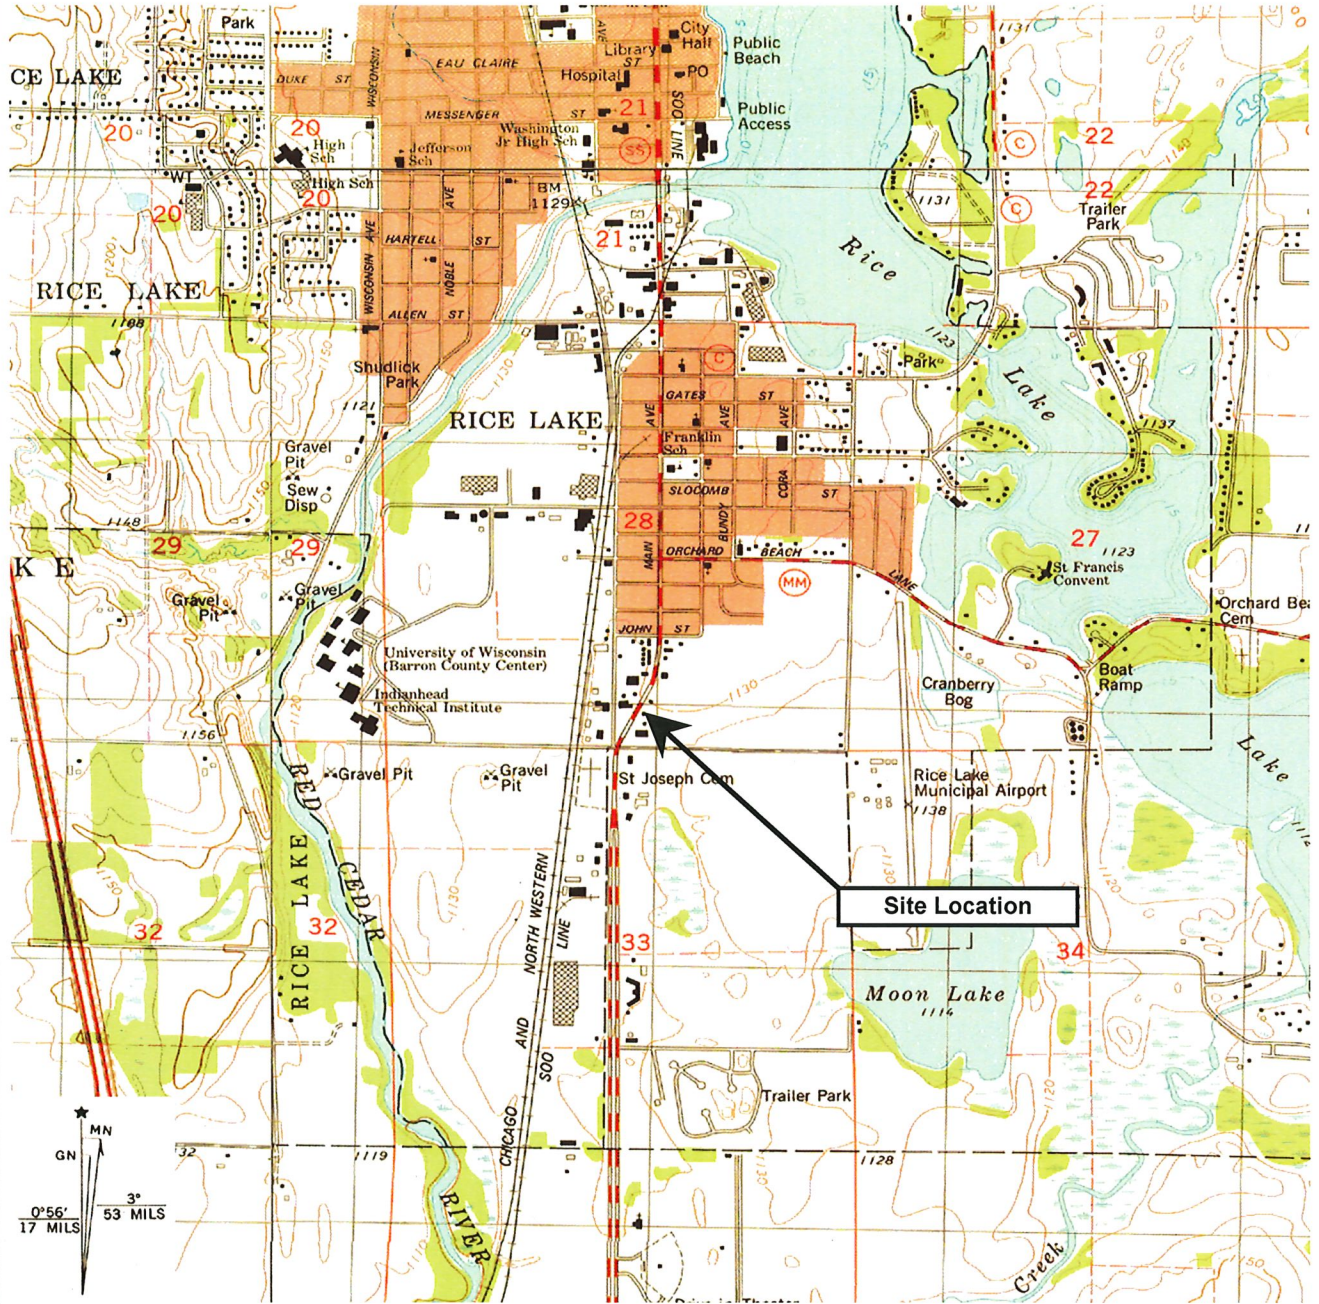

- 1) Groundwater does not appear to be impacted on site.
- 2) There are no known potable or public supply wells impacted or threatened.
- 3) Contamination is not present within a meter of bedrock.
- 4) There is no indication of measurable free product in the groundwater.
- 5) There are no surface waters known to be impacted.

Summary and Conclusions

Based on the site investigation results, the extent of impacted soil appears to be confined to the immediate area of the former UST basin and former pump islands. Based on the depth of the residual impacted soil (greater than 4 feet) and the impervious surface above, the direct contact risk is likely minimal and therefore additional investigation and/or remedial activities are not warranted. No further action is recommended for this site. However, petroleum impacted soil exceeding WDNR NR 720 residual contaminant levels (RCLs) may still be present beneath the site. Therefore, pursuant to WDNR ch. NR 726, the required Geographic Information System (GIS) registry information for the referenced site is attached.

Re: Underground Storage Tank Piping and Dispenser Upgrade
Kwik Trip Store #749
1821 Main Street
Rice Lake, Wisconsin

Dear Ms. Wincentzen:

On August 29, 2005, a piping and dispenser upgrade for the underground storage tank (UST) system was completed at Kwik Trip Store #749, 1821 Main Street, Rice Lake, Wisconsin. A Site Location Map and Site Map are attached.

PID readings and soil samples were taken beneath the dispenser islands and associated piping that were removed and replaced. Impacted soil encountered beneath dispenser islands and piping (107.09 tons) was removed from the site and taken to Waste Management's Timberline Trail Landfill Recycling and Disposal Facility in Weyerhaeuser, Wisconsin (see attached landfill receipt). In the areas of contamination, soil was removed until the PID no longer detected organic vapors or to the extent practicable. Confirmatory samples were collected below the piping runs and dispensers. The GRO and PVOC analytical results from these confirmatory samples indicate the impacted soils were effectively removed except for the area of ST-4. The location of the impacted soils at location ST-4 did not allow for further excavation without compromising the safety of the work site. PID readings and soil sample results are summarized in Table 1 and Table 2. Laboratory analytical results are included as an attachment.

Rochester Petroleum Equipment of Stewartville, Minnesota removed and replaced the piping and Braun Intertec Corporation of La Crosse, Wisconsin completed the site assessment.

A completed, WDNR Non-Emergency Hazardous Substance Release Notification form is also attached for your records. Approximately 108 tons of petroleum impacted soil was removed from beneath the dispenser islands and associated piping. Additionally, the residual impacted soil in the area of ST-4 will be covered with concrete and/or asphalt. This will reduce the downward migration or infiltration of petroleum constituents to the soil / groundwater interface. Based on the depth of the residual impacted

soil (greater than 4 feet) and the impervious surface above, the direct contact risk is likely minimal. Based on these results, it is our opinion that additional investigation and/or remedial activities are not warranted. Therefore, no further action is recommended for this site.

Sincerely,

BRAUN INTERTEC CORPORATION

David M. Bradshaw
Environmental Technician

SP-7 West	WOH1073-15	08/29/05 12:21
Duplicate	WOH1073-16	08/29/05

Case Narrative: Samples appear to be nonhomogeneous.

Samples were received into laboratory at a temperature of 4 °C.

Wisconsin Certification Number: 128053530, DATCP #266

Unless subcontracted, volatiles analyses (including VOC, PVOC, GRO, BTEX, and TPH gasoline) performed by TestAmerica Watertown at 1101 Industrial Drive, Units 9&10. All other analyses performed at the address shown in the heading of this report.

Approved By:

TestAmerica Analytical - Watertown

Emergency Discharges / Spills should be reported via the 24-Hour Hotline: 1-800-943-0003

Notice: Hazardous substance discharges must be reported immediately according to the "Spills Law", s. 292.11 Wis. Stats., Section NR 706.05(1)(b), Wis. Adm. Code, requires that hazardous substance discharges are to be reported by one of three methods: telephoning the Department (toll free Spill Hotline number above), telefaxing a report to the Department or visiting a Department office in person. If you choose to notify the Department by telefax, you should use this form to be sure that all necessary information is included. However use of this form is not mandatory. Under s. 292.99, Wis. Stats., the penalty for violating the reporting requirements of ch. 292 Wis. Stats., shall be no less than \$10 nor more than \$5000 for each violation. Each day of continued violation is a separate offense. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than program administration. However, information submitted on this form may also be made available to requesters under Wisconsin's Open Records Law (ss. 19.31 – 19.39, Wis. Stats.). Confirmatory laboratory data should be included with this form, to assist the DNR in processing this Hazardous Substance Release Notification.

Complete this form. **TYPE or PRINT LEGIBLY.** FAX it to the appropriate DNR region (see next page) **IMMEDIATELY** upon discovery of a potential release from (**check one**):

- Underground Petroleum Storage Tank System
- Aboveground Petroleum Storage Tank System
- Dry Cleaner Facility (DERP eligibility based on: Facility owner/operator Property owner of licensed facility)
- Other - Describe:

TO DNR, ATTN: R & R Program Assistant	(Area Code) FAX Number
--	------------------------

1. Discharge reported by:		
Name David Bradshaw	Firm Braun Intertec	Date FAXed to DNR 09/01/2005

Mailing Address 2831 Larson St, LaCrosse, WI	(Area Code) Phone Number (608)781-7277
--	--

2. Site Information
Name of site at which discharge occurred. Include local name of site/business, not responsible party name, unless a residence / vacant property **Kwik Trip Store# 749**

Location: Include street address, not PO Box. If no street address, describe as precisely as possible, i.e., 1/4 mile NW of CTHs 60 & 123 on E side of CTH 60
1821 S. Main Street

Municipality (City, Village, Township) Specify municipality in which the site is located, not mailing address/city
Rice Lake

County: Barron	Legal Description: SW 1/4, SE 1/4, Section 28 , Tn 35N , Range 11W E / W (circle one)
-------------------	---

3. Responsible Party (RP) and/or RP Representative
 Responsible Party Name: Business or owner name that is responsible for cleanup. If more than one, list all Attach additional pages as necessary
KwikTrip, Inc.

Reported in compliance with s. 292.11(2), Wis. Stats., by a local government exempt from liability under s. 292.11(9)(e), Wis. Stats. For more information see http://dnr.wi.gov/org/aw/rr/liability/muni_1.html

Contact Person Name (if different) Troy Batzel	Phone Number (608)793-6283
--	--------------------------------------

Mailing Address PO Box 2107	City LaCrosse	State WI	ZIP Code 54603
---------------------------------------	-------------------------	--------------------	--------------------------

4. Hazardous Substance Impact Information

Identify hazardous substance discharged (check all that apply):

METALS

- Arsenic
- Chromium
- Lead
- Mercury
- Metals (specify): _____

SOLVENTS

- Solvent-Chlorinated
- Solvent-Non Chlorinated
- PERC
- VOC's

INDUSTRIAL CHEMICALS

- Ammonia
- Cyanide
- Paint
- PCB's
- VOC's
- Fertilizers
- Pesticide/Herbicide/Insecticide(s)
- Leachate
- RCRA Hazardous Waste

PETROLEUM

- Diesel/Fuel Oil
- Engine Oil/Waste Oil
- Mineral/Transmission/Hydraulic Oil
- Gasoline (Pb/Non-Pb/Unknown)
- Jet Fuel/Kerosene
- MTBE
- VOC's
- PAH's/SVOC
- Petroleum-Unknown Type
- Unknown
- Other (specify): UNLEADED GASOLINE

Impacts to the environment (enter "K" for known/confirmed or "P" for potential for all that apply)

Subject: Reported Contamination at Kwik Trip Store #749, Rice lake WI
WDNR BRRTS # 03-03-543961

Dear Mr. Batzel:

On September 2, 2005, Braun Intertec Corp., notified the Wisconsin Department of Natural Resources ("WDNR") that petroleum soil contamination had been detected at the site described above.

Based on the information that has been submitted to the WDNR regarding this site, we believe you are responsible for investigating and restoring the environment at the above-described site under Section 292.11, Wisconsin Statutes, known as the hazardous substances spills law.

This letter describes the legal responsibilities of a person who is responsible under section 292.11, explains what you need to do to investigate and clean up the contamination, and provides you with information about cleanups, environmental consultants, possible financial assistance, and working cooperatively with the WDNR and Department of Commerce ("Commerce").

Legal Responsibilities:

Your legal responsibilities are defined both in statute and in administrative codes. The hazardous substances spill law, Section 292.11 (3) Wisconsin Statutes, states:

- **RESPONSIBILITY.** A person who possesses or controls a hazardous substance which is discharged or who causes the discharge of a hazardous substance shall take the actions necessary to restore the environment to the extent practicable and minimize the harmful effects from the discharge to the air, lands, or waters of the state.

Wisconsin Administrative Code chapters NR 700 through NR 749 establish requirements for emergency and interim actions, public information, site investigations, design and operation of remedial action systems, and case closure. Chapter NR 708 includes provisions for immediate actions in response to limited contamination. Wisconsin Administrative Code chapter NR 140 establishes groundwater standards for contaminants that reach groundwater.

Steps to Take:

The longer contamination is left in the environment, the farther it can spread and the more it may cost to clean up. Quick action may lessen damage to your property and neighboring properties and reduce your costs in investigating and cleaning up the contamination. To ensure that your cleanup complies with Wisconsin's laws and administrative codes, you should hire a professional environmental consultant who understands what needs to be done. These are the first three steps to take:

1. Within the next **30 days**, by December 10, 2005, you should submit written verification (such as a letter from the consultant) that you have hired an environmental consultant. If you do not take action within this time frame, the WDNR may initiate enforcement action against you.
2. Within the next **60 days**, by January 9, 2006, your consultant should submit a work plan and schedule for the investigation. The consultant must comply with the requirements in the NR 700 rule series and should refer to WDNR technical guidance documents. To facilitate prompt agency review of your reports, your consultant should use the site investigation and closure formats which are available on-line at www.dnr.state.wi.us.

Once an investigation has established the degree and extent of contamination at your site, your consultant will be able to determine whether Commerce or the WDNR has authority over the case.

3. Within 30 days of completion of the site investigation, you or your consultant must provide a brief report at least every 90 days as required by s. NR 724.13 (3), Wis. Adm. Code. Quarterly reports need only include one or two pages of text, plus any relevant maps and tables. Should conditions at your site warrant, we may require more frequent contacts.
4. Sites where discharges to the environment have been reported are entered into the Bureau for Remediation and Redevelopment Tracking System ("BRRTS"), a version of which appears on the WDNR's internet site. You may view the information related to your site at any time (<http://www.dnr.state.wi.us/org/aw/rr/brrts>) and use the feedback system to alert us to any errors in the data.

If you want a formal response from the agency on a specific submittal, please be aware that a review fee is required in accordance with ch. NR 749, Wis. Adm. Code. If a fee is not submitted with your reports, you should proceed under the advice of your consultant to complete the site investigation to maintain your compliance with the spills law and chapters NR 700 through NR 749. **Do not delay the investigation of your site by waiting for an agency response.** We have provided detailed technical guidance to environmental consultants. Your consultant is expected to know our technical procedures and administrative rules and should be able to answer your questions on meeting cleanup requirements.

All correspondence regarding this site should be sent to:

Danielle Wincentsen
Remediation and Redevelopment Program
Wisconsin Department of Natural Resources
223 E Steinfest Rd
Antigo, WI 54409

Unless otherwise requested, please send only one copy of plans and reports. To speed processing, correspondence should reference the BRRTS and FID numbers (if assigned) shown at the top of this letter.

Additional Information for Site Owners:

Information to help you select a consultant, and materials on controlling costs, understanding the cleanup process, and choosing a site cleanup method are enclosed. In addition, *Fact Sheet 2, Voluntary Party Remediation and Exemption from Liability* provides information on obtaining the protection of limited liability under s. 292.15, Wis. Stats.

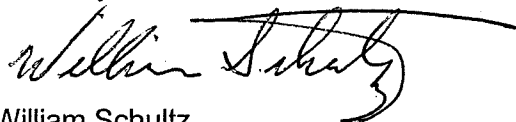

Financial Assistance:

Reimbursement from the Petroleum Environmental Cleanup Fund (PECFA) may be available for some of the costs of cleaning up contamination from eligible petroleum storage tanks. Please refer to the enclosed information sheet entitled "*Information About PECFA*" for more information on eligibility and regulations for this program. For more information on the PECFA program, please call the Department of Commerce at 608-266-2424 or visit their web site at: <http://www.commerce.state.wi.us/COM/Com-Petroleum.html>. Funding is also available for cleanup at some dry cleaning sites.

Call William Schultz at (715) 365-8965 for all other questions regarding this letter.

Thank you for your cooperation.

Sincerely,

William Schultz
Engineer

Re: Petroleum impacted soils encountered during piping upgrade, Kwik Trip Store #749, 1821 S. Main Street, Rice Lake, Wisconsin

On August 29 and 30, 2005, a piping upgrade for the UST system at Kwik Trip Store # 749, 1821 South Main Street, Rice Lake, Wisconsin was completed. Site Location map is attached. On August 29, 2005 petroleum impacted soils were encountered during the removal of dispenser islands and associated piping.

Photoionization detector (PID) readings and soil samples were taken beneath the dispenser islands and piping that were removed and replaced. Impacted soil encountered beneath the dispenser islands and piping at locations (labeled ST-3, ST-4, ST-5 and ST-6 on the attached Site Layout Map) were stockpiled and sampled. The stockpiles of petroleum impacted soil (approximately 6 dump truck loads) were removed from the site and taken to the Waste Management's Timberline Trail facility in Weyerhaeuser, Wisconsin. Samples were collected at approximately six feet below grade under the dispenser islands and approximately three feet below grade under the piping. The analytical results of gasoline range organics (GRO) and petroleum volatile organic compound (PVOs) are pending.

Impacted soils were removed to the extent practicable and all that remains at the site would be inaccessible residual soils. A complete UST Site Assessment Report will follow as soon as analytical data is available.

Sincerely:

**Fax Notification For Hazardous Substance Discharge
(Non-Emergency Only)**

Form 4400-225 (07-03) Page 1 of 2

Emergency Discharges / Spills should be reported via the 24-Hour Hotline: 1-800-943-0003

Notice: Hazardous substance discharges must be reported immediately according to the "Spills Law", s. 292.11 Wis. Stats., Section NR 706.05(1)(b), Wis. Adm. Code, requires that hazardous substance discharges are to be reported by one of three methods: telephoning the Department (toll free Spill Hotline number above), telefaxing a report to the Department or visiting a Department office in person. If you choose to notify the Department by telefax, you should use this form to be sure that all necessary information is included. However use of this form is not mandatory. Under s. 292.99, Wis. Stats., the penalty for violating the reporting requirements of ch. 292 Wis. Stats., shall be no less than \$10 nor more than \$5000 for each violation. Each day of continued violation is a separate offense. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than program administration. However, information submitted on this form may also be made available to requesters under Wisconsin's Open Records Law (ss. 19.31 - 19.39, Wis. Stats.). Confirmatory laboratory data should be included with this form, to assist the DNR in processing this Hazardous Substance Release Notification.

Complete this form. **TYPE or PRINT LEGIBLY.** FAX it to the appropriate DNR region (see next page) **IMMEDIATELY** upon discovery of a potential release from (check one):

- Underground Petroleum Storage Tank System
- Aboveground Petroleum Storage Tank System
- Dry Cleaner Facility (DERP eligibility based on: Facility owner/operator Property owner of licensed facility)
- Other - Describe:

TO DNR, ATTN: R & R Program Assistant	(Area Code) FAX Number
---------------------------------------	------------------------

1. Discharge reported by:		
Name David Bradshaw	Firm Braun Intertec	Date FAXed to DNR 09/01/2005
Mailing Address 2831 Larson St, LaCrosse, WI		(Area Code) Phone Number (608)781-7277

2. Site Information
Name of site at which discharge occurred. Include local name of site/business, not responsible party name, unless a residence / vacant property **Kwik Trip Store# 749**

Location: Include street address, not PO Box. If no street address, describe as precisely as possible, i.e., 1/4 mile NW of CTHs 60 & 123 on E side of CTH 60
1821 S. Main Street

Municipality (City, Village, Township) Specify municipality in which the site is located, not mailing address/city
Rice Lake

County: Barron	Legal Description: SW 1/4, SE 1/4, Section 28, Tn 35N, Range 11W E / W (circle one)

4. Hazardous Substance Impact Information

Identify hazardous substance discharged (check all that apply):

METALS

- Arsenic
- Chromium
- Lead
- Mercury
- Metals (specify): _____

INDUSTRIAL CHEMICALS

- Ammonia
- Cyanide
- Paint
- PCB's
- VOC's
- Fertilizers
- Pesticide/Herbicide/Insecticide(s)
- Leachate
- RCRA Hazardous Waste

PETROLEUM

- Diesel/Fuel Oil
- Engine Oil/Waste Oil
- Mineral/Transmission/Hydraulic Oil
- Gasoline (Pb/Non-Pb/Unknown)
- Jet Fuel/Kerosene
- MTBE
- VOC's
- PAH's/SVOC
- Petroleum-Unknown Type
- Unknown
- Other (specify): _____

SOLVENTS

- Solvent-Chlorinated
- Solvent-Non Chlorinated
- PERC
- VOC's

UNLEADED GASOLINE

Impacts to the environment (enter "K" for known/confirmed or "P" for potential for all that apply)
