Status Report – February 2017 Soil Gas and Groundwater Monitoring Results  
United Laundries and Dry Cleaners, Inc. 623 Reed Avenue, Manitowoc, Wisconsin

Dear Mr. Beggs:

Shannon & Wilson prepared this Report to summarize February 2017 soil gas and groundwater results for the United Laundries and Dry Cleaners, Inc. (United) facility. Site activities were completed in accordance with Shannon & Wilson's January 11, 2017 change order request. The change order was prepared in response to WDNR's review of Wisconsin Department of Natural Resources (WDNR) Case Closure Denial letter dated August 11<sup>th</sup>, 2016, and subsequent email dated December 22, 2016. The scope of work for this revised change order was approved by WDNR on January 19, 2017 and includes the following tasks:

- Additional groundwater sample collection at MW-10 in February and May 2017;
- Additional soil sample collection to define the extent of soil contamination;
- SVE confirmation soil and soil gas sample collection;
- Operation and Maintenance Plan preparation; and
- Resubmittal of Case Closure documents.

#### ***February 2017 Groundwater and Soil Gas Sample Collection***

Additional groundwater and soil gas samples were collected on February 1, 2017. A groundwater sample collected at MW-10 was submitted to Pace Analytical and analyzed for VOCs by Method 8260. Historic groundwater monitoring results are summarized in Table 1 and the laboratory report is included in Appendix A.

Concurrent with MW-10 sample collection, Shannon & Wilson collected sub-floor soil gas samples at the United and Piggly Wiggly buildings. In preparation for soil gas sampling, all three SSDS's were turned off on December 30, 2016. Soil gas samples were collected from sub-floor vapor probes VP-1, VP-2, and VP-3 at the United Dry Cleaner building and at VP-4 at the Piggly Wiggly building. Flexible tubing was used to connect each probe to 6-liter Summa canisters provided by the laboratory. Summa canisters were equipped with a flow controller calibrated by the laboratory; each canister took 45 minutes to fill.

February 2017 soil gas sampling included a background sample, an indoor air sample, and a duplicate sample. Summa canisters for indoor air and background samples were equipped with a flow controller calibrated by the laboratory for eight-hours. The summa canister for the background sample was placed near the exterior southern wall the United Dry Cleaners building, and the sample collected on February 1<sup>st</sup> between 6:00 a.m. and 2:00 p.m. The canister for the indoor air sample was placed near the center of the United Dry Cleaner building within the former dry cleaner store. This sample collected on January 31<sup>st</sup> between 4:00 p.m. and 12:00 p.m. while the building was unoccupied. The duplicate sample was collected at VP-2.

All air samples were analyzed for chlorinated VOCs (cis-1,2-dichloroethene, trans 1,2-dichloroethene, tetrachloroethene, trichloroethene, and vinyl chloride) using EPA Method TO-15 by Pace Analytical Services of Minneapolis, Minnesota. Vapor probe and indoor results are summarized in Tables 2A and 2B. Laboratory reports for February 2017 soil gas samples are included in Appendix B.

### ***Soil Sample Collection***

Shannon & Wilson collected soil samples from perimeter soil borings SB-1 through SB-5 on January 31, 2017 to further identify the lateral and vertical extent of soil contamination. At each perimeter boring Geoprobe Macrocore samplers were advanced continuously to a depth of 15 feet below grade. Soil samples were then collected at intervals 3 to 5, 8 to 10, and 13 to 15 feet below grade and submitted to Pace Analytical for VOCs analyses by Method 8260. Laboratory reports for soil samples collected at borings SB-1 through SB-5 are included in Appendix C.

To further evaluate residual soil contamination remaining after soil vapor extraction, Shannon & Wilson collected additional soil samples as follows:

- Between 3 and 5 feet beneath the United Dry Cleaners building adjacent to previous borings A3 and A4;
- From the base of the excavation (between 12.5 and 13 feet below grade) near the previous BS-1 sample;

- From the base of the excavation (between 13.5 and 14 feet below grade) adjacent to VE-1<sup>1</sup>, and,
- From the base of the excavation (between 15 and 16 feet below grade) near the previous BS-3 sample.

These soil samples were also submitted to Pace Analytical for VOCs analyses by Method 8260. Laboratory reports for these samples are also included in Appendix C.

Subsurface soil units were visually classified in accordance with the Unified Soil Classification system and recorded on field logs. All boreholes were abandoned with granular bentonite following sample collection. Soil Boring Logs and Borehole Abandonment forms are included in Appendix D. Borings are shown on Figure 1.

### ***February 2017 Groundwater, Soil, and Soil Gas Sample Results***

Tetrachloroethene (PCE) was detected in the February 2017 MW-10 sample at a low concentration (3.9 ug/L). As with previous MW-10 samples, PCE was detected above the 0.5 ug/L Preventive Action Limit (PAL), but below the 5 mg/L Enforcement Standard (ES).

In February 2017 PCE in soil gas ranged from 6.4 ppbv at VP-4 to 97.9 ppbv at VP-2, and TCE was detected at 0.084 ppbv at VP-3. PCE was also detected in the indoor air sample at 122 ppbv, and in the background samples at 0.52 ppbv. PCE detected in the indoor air samples exceeded the vapor action level (VAL) for residential buildings and for small commercial buildings. However, PCE in November 2016 and February 2017 vapor probes samples are below the 210 ppbv Vapor Risk Screening Level (VRSL) for residential buildings, and below the 900 ppbv VRSL for small commercial buildings.

PCE detected in the indoor air sample is higher than PCE detected at sub-floor vapor probe sample VP-2. The indoor air sample may be related to past use of this suite as a dry cleaning store. Though all dry cleaning equipment has been removed, three drums that containing dry cleaning chemicals remain. Because the indoor air sample was collected in the evening while the building was not occupied, dry cleaning chemicals likely interfered with the indoor air sample.

Methylene chloride, a common laboratory contaminant, was detected at a low concentration at SB-1 in the sample collected between 3 and 5 feet below grade. No other VOCs were detected in the remaining samples collected from perimeter borings SB-1, SB-2, SB-2, SB-4, and SB-5.

---

<sup>1</sup> Verification soil sample BS-2 was collected from the VE-1 borings between 13.5 and 14 feet below grade.

PCE was detected at low concentrations in samples collected beneath the building floor at borings A3 and A4, and beneath the base of the backfilled excavation. However, post remediation concentrations are significantly lower than pre-remediation results.

### ***Recommendations***

Shannon & Wilson will collect another MW-10 groundwater sample in May 2017. If PCE at MW-10 remains below the ES, no additional groundwater sampling will be recommended. If property ownership remains unchanged we recommend that previously submitted off-site letters sent in May 2016 be included with the revised case closure request.

Shannon & Wilson will also collect additional soil gas samples in May 2017. Samples will be collected from sub-floor vapor probes VP-1, VP-2, and VP-3 at the United Dry Cleaner building and at VP-4 at the Piggly Wiggly building. May 2017 soil gas sampling will also include a background sample, an indoor air sample, and a duplicate sample. If May 2017 soil gas concentrations are below the VRSLs no additional soil gas sampling will be recommended. The indoor air sample will be collected from the former dry cleaning store (center suite) after all dry cleaning chemicals have been removed. Because the dry cleaning business is no longer operating, the tenant has made arrangements for removal of dry cleaning chemicals that remain.

No additional soil sampling is recommended. Samples collected from perimeter borings SB-1 through SB-5 indicate that the lateral and vertical extent of contamination has been identified. Results for post remediation soil samples collected at A3 and A4 indicates that residual PCE contamination remains beneath the building floor. Results for BS-1, BS-2, and BS-3 also indicate that residual PCE contamination remains at the base of the excavation. However, post remediation concentrations are significantly lower than pre-remediation results shown in Table 3. These results indicate that soil vapor extraction removed PCE beyond the limits of excavation and from shallow soil beneath the building.

Shannon & Wilson understands that operation of three sub-floor depressurization systems (SSDS)<sup>2</sup> will not be required as a continuing obligation following case closure if no VRSLs are exceeded in November 2016, February 2017, and May 2017 vapor probes. November 2016 and February 2017 soil gas samples were collected while the SSDS system were not in operation, and results indicate soil gas is below the VRSL for both residential and small commercial buildings.

---

<sup>2</sup> All three SSDS's were installed as an interim response in December 2011.

PAL - Preventive Action Limit per Wisconsin Admin. Code sec. NR 141.10.

ES - Enforcement Standard per Wisconsin Admin. Code sec. NR 141.10.

< - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

Duplicate sample results are shown in parenthesis.

All concentrations are reported in µg/l

Concentrations exceeding the PAL are in red italics.

Concentrations exceeding the ES have been shaded yellow.

**Table 2A**  
**Results for Soil Gas Probes – Residential Building Vapor Risk Screening Levels**  
**Piggly Wiggly and United Dry Cleaners Buildings**  
**United Laundries and Dry Cleaners, Inc., 623 Reed Avenue, Manitowoc, Wisconsin**

Notes:

Vapor Risk Screening Level (VRSL) = Vapor Action Level (VAL) ÷ Attenuation Factor (AF) per Wisconsin Department of Natural Resources Quick Look-Up Table, dated May 2016.

Vapor Action Level (VAL) for Residential Land Use per Wisconsin Department of Natural Resources Quick Look-Up Table, dated May 2016.

Attenuation Factor (AF) = 0.03 for sub-floor vapor for Residential/Small Commercial Buildings per Wisconsin Department of Natural Resources Quick Look-Up Table, dated June 2015

Concentrations exceeding the VRSL are shown in bold.

< Below reporting limit

J Estimated concentration at or above the LOD and below the LQD.

All units are reported in parts per billion by volume (ppbv)

### Notes:

Vapor Risk Screening Level (VRSL) = Vapor Action Level (VAL) ÷ Attenuation Factor (AF) per Wisconsin Department of Natural Resources Quick Look-Up Table, dated May 2016.

Vapor Action Level (VAL) for Residential Land Use per Wisconsin Department of Natural Resources Quick Look-Up Table, dated May 2016.

Attenuation Factor (AF) = 0.03 for sub-floor vapor for Residential/Small Commercial Buildings per Wisconsin Department of Natural Resources Quick Look-Up Table, dated June 2015.

Concentrations exceeding the VRSI<sub>1</sub> are shown in bold.

< Below reporting limit

J Estimated concentration at or above the LOD and below the LOQ.

All units are reported in parts per billion by volume (ppbv)

All units are reported

Madison, WI 53711

RE: Project: 42-1-37409 UNITED DRY CLEANERS  
Pace Project No.: 40145094

Dear Mark McColloch:

Enclosed are the analytical results for sample(s) received by the laboratory on February 01, 2017. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Dan Milewsky  
dan.milewsky@pacelabs.com  
Project Manager

## QUALIFIERS

Project: 42-1-37409 UNITED DRY CLEANERS  
Pace Project No.: 40145094

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor and percent moisture.

LOQ - Limit of Quantitation adjusted for dilution factor and percent moisture.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

### ANALYTE QUALIFIERS

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

### **Laboratory Report November 2017 Soil Gas Samples**

February 03, 2017

Mark McColloch  
SHANNON & WILSON, INC.  
6506 Schroeder Road  
Suite 201  
Madison, WI 53711

RE: Project: 42-1-37409 UNITED DRY CLEANERS  
Pace Project No.: 40145096

Dear Mark McColloch:

Enclosed are the analytical results for sample(s) received by the laboratory on February 01, 2017. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Dan Milewsky  
dan.milewsky@pacelabs.com  
Project Manager

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: SB-1 3-5' Lab ID: 40145096001 Collected: 01/31/17 11:00 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

---

Sample: SB-1 8-10' Lab ID: 40145096002 Collected: 01/31/17 11:05 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: SB-1 13-15' Lab ID: 40145096003 Collected: 01/31/17 11:15 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

---

Sample: SB-2 3-5' Lab ID: 40145096004 Collected: 01/31/17 10:35 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: SB-2 8-10' Lab ID: 40145096005 Collected: 01/31/17 10:40 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: SB-2 13-15' Lab ID: 40145096006 Collected: 01/31/17 10:50 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: SB-3 3-5' Lab ID: 40145096007 Collected: 01/31/17 09:45 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: SB-3 8-10' Lab ID: 40145096008 Collected: 01/31/17 09:55 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: SB-3 13-15' Lab ID: 40145096009 Collected: 01/31/17 10:10 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: SB-4 3-5' Lab ID: 40145096010 Collected: 01/31/17 10:15 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

---

Sample: SB-4 8-10' Lab ID: 40145096011 Collected: 01/31/17 10:25 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

---

Sample: SB-4 13-15' Lab ID: 40145096012 Collected: 01/31/17 10:30 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

---

Sample: SB-5 3-5' Lab ID: 40145096013 Collected: 01/31/17 12:15 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

---

Sample: SB-5 8-10' Lab ID: 40145096014 Collected: 01/31/17 12:25 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: SB-5 13-15' Lab ID: 40145096015 Collected: 01/31/17 12:35 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: BS-1 12.5-13' Lab ID: 40145096016 Collected: 01/31/17 11:45 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: BS-2 13.5-14' Lab ID: 40145096017 Collected: 01/31/17 11:55 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: BS-3 15-16' Lab ID: 40145096018 Collected: 01/31/17 12:05 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 42-1-37409 UNITED DRY CLEANERS

Pace Project No.: 40145096

Sample: A4 3-5' Lab ID: 40145096020 Collected: 01/31/17 14:35 Received: 02/01/17 13:15 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## QUALIFIERS

Project: 42-1-37409 UNITED DRY CLEANERS  
Pace Project No.: 40145096

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor and percent moisture.

LOQ - Limit of Quantitation adjusted for dilution factor and percent moisture.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

### ANALYTE QUALIFIERS

W Non-detect results are reported on a wet weight basis.

RE: Project: 42-1-37409 UNITED DRY CLEANER  
Pace Project No.: 10378044

Dear Mr. McColloch:

Enclosed are the analytical results for sample(s) received by the laboratory on February 02, 2017. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Carolynne Trout

## QUALIFIERS

Project: 42-1-37409 UNITED DRY CLEANER

Pace Project No.: 10378044

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor and percent moisture.

LOQ - Limit of Quantitation adjusted for dilution factor and percent moisture.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

DISCLAIMER: These results have been converted to the units shown from the original units of measurement assuming 20 degrees Celsius and 1 atmosphere pressure. Values were not rounded according to EPA rounding rules. THC is quantitated based on the average response factors of several compounds; the nominal molecular weight of THC used for units conversion is the average of the molecular weights of the compounds used for quantitation.

DISCLAIMER: These results have been converted to the units shown from the original units of measurement assuming 20 degrees Celsius and 1 atmosphere pressure. Values were not rounded according to EPA rounding rules. THC is quantitated based on the average response factors of several compounds; the nominal molecular weight of THC used for units conversion is the average of the molecular weights of the compounds used for quantitation.
