Mark,

The Department has reviewed the March 10, 2020 status report for the Laundry Basket site. Based on the review, we do not feel the site is ready to be submitted for closure at this time. Because of the proximity of the Village of Lucks Municipal #2, additional groundwater monitoring is required to monitor the contaminant plume to ensure the protection of the municipal water supply. Please submit a groundwater sampling plan that includes sampling of municipal well #2 semi-annually at a minimum, and selected wells to document the contaminant plume condition.

Let me know if you have any questions.

Thanks,

Phil
