Tauren:

I met with Kathleen by phone on Wednesday, and we are trying to schedule a meeting with the broader team early next week for final revisions/edits.

Sincerely,

**Harris Byers, Ph.D.**

Hi Harris,

Thank you for the update. Back in May I had been in discussion with Newell Rubbermaid regarding the PFAS investigation for the site. They had said that they had been working with the City on access to the site for site investigation activities and hired a consultant to put together a work plan for additional PFAS investigation; however, they did not want to finalize the work plan until they received the latest PFAS groundwater results. I'm not sure where the discussion is currently at between the City and Newell, but that would be the only time sensitive issue is getting those results to Newell, so they can continue with the PFAS investigation.

Regards,

Tauren.

Yes, that was the plan. Then a potential purchaser was identified this summer, so we wanted to get a more firm understanding of the proposed reuse so we can put the soil/groundwater results into context. Waiting on our structural engineer's final decision on a few critical issues; though I think we are nearing consensus.

The draft of the report is due internally on Friday, so I expect it will be ready for you a week or so afterwards.

Is there something time-sensitive on your end?

Harris

**Subject:** Status Update Request for Mirro Plt 9 (Former) - LGU, BRRTS # 02-36-545108

Hi Harris,

I am looking for a status update as to when the summary report for soil and groundwater sampling for the Mirro Plt 9 (former) site will be submitted. It was my understanding based on previous correspondence in May 2019 that a summary report was going to be provided in approximately June/July 2019. It indicates in the schedule for the work plan that phases 1-3 would be completed by summer 2019. I know the last phase isn't supposed to be done until spring 2020 and the full report isn't supposed to be done until late spring 2020. However, please provide a summary with data tables and figure(s).

Thanks,

**We are committed to service excellence.**
