Subject: WDNR NR700 Semi-Annual Reporting: 02-36-545108 MIRRO PLT 9 (FORMER) - LGU

Hello Tauren;

This e-mail serves as a NR700 Semi-Annual progress report for the Former Mirro Plant No. 9 (BRRTS No. 02-36-545108) in Manitowoc, Wisconsin for the reporting period of July 1 to December 31, 2022. Please note, Ramboll attempted to completed the reporting requirements via the WDNR provided notification e-mail; however, a report was already submitted. As such, the web-link is no longer valid.

Ramboll, on behalf of Newell Operating Company (NOC), initiated the WDNR approved *Additional Site Investigation Work Plan* in July 2022 by first requesting off-site access for monitoring well installations. Off-site access at one location was not granted by the property owner and Ramboll requested WDNR assistance concerning access negotiation. The WDNR responded to the request for assistance indicating the off-site location was not specifically required at this time. As such, two of the three additional monitoring wells were installed, and the initial quarterly groundwater sampling event was completed in October 2022. The groundwater sampling results were received, and data transmittal letters were issued in November and December 2022. The second quarterly groundwater sampling event is anticipated to be completed in January 2023.
