Dear Jennifer:

Attached is the sixth DERF Claim for the site activities listed at this property.

During this claim period, additional downgradient monitoring wells were installed, and the entire monitoring well network was sampled in preparation for a remedial injection.

The claim totals \$31,885.90. We have removed \$3,475.00 in charges related to permits, travel expenses, Voluntary Party Liability Exemption requirements, and application fees. If any of these charges do not need to be ineligible, please consider them for payment.

I trust this information meets your needs.

Sincerely,

Matt Dahlem, PG
Branch Manager
