DODDAC #: _____ TOTAL MAN-HOURS: 12

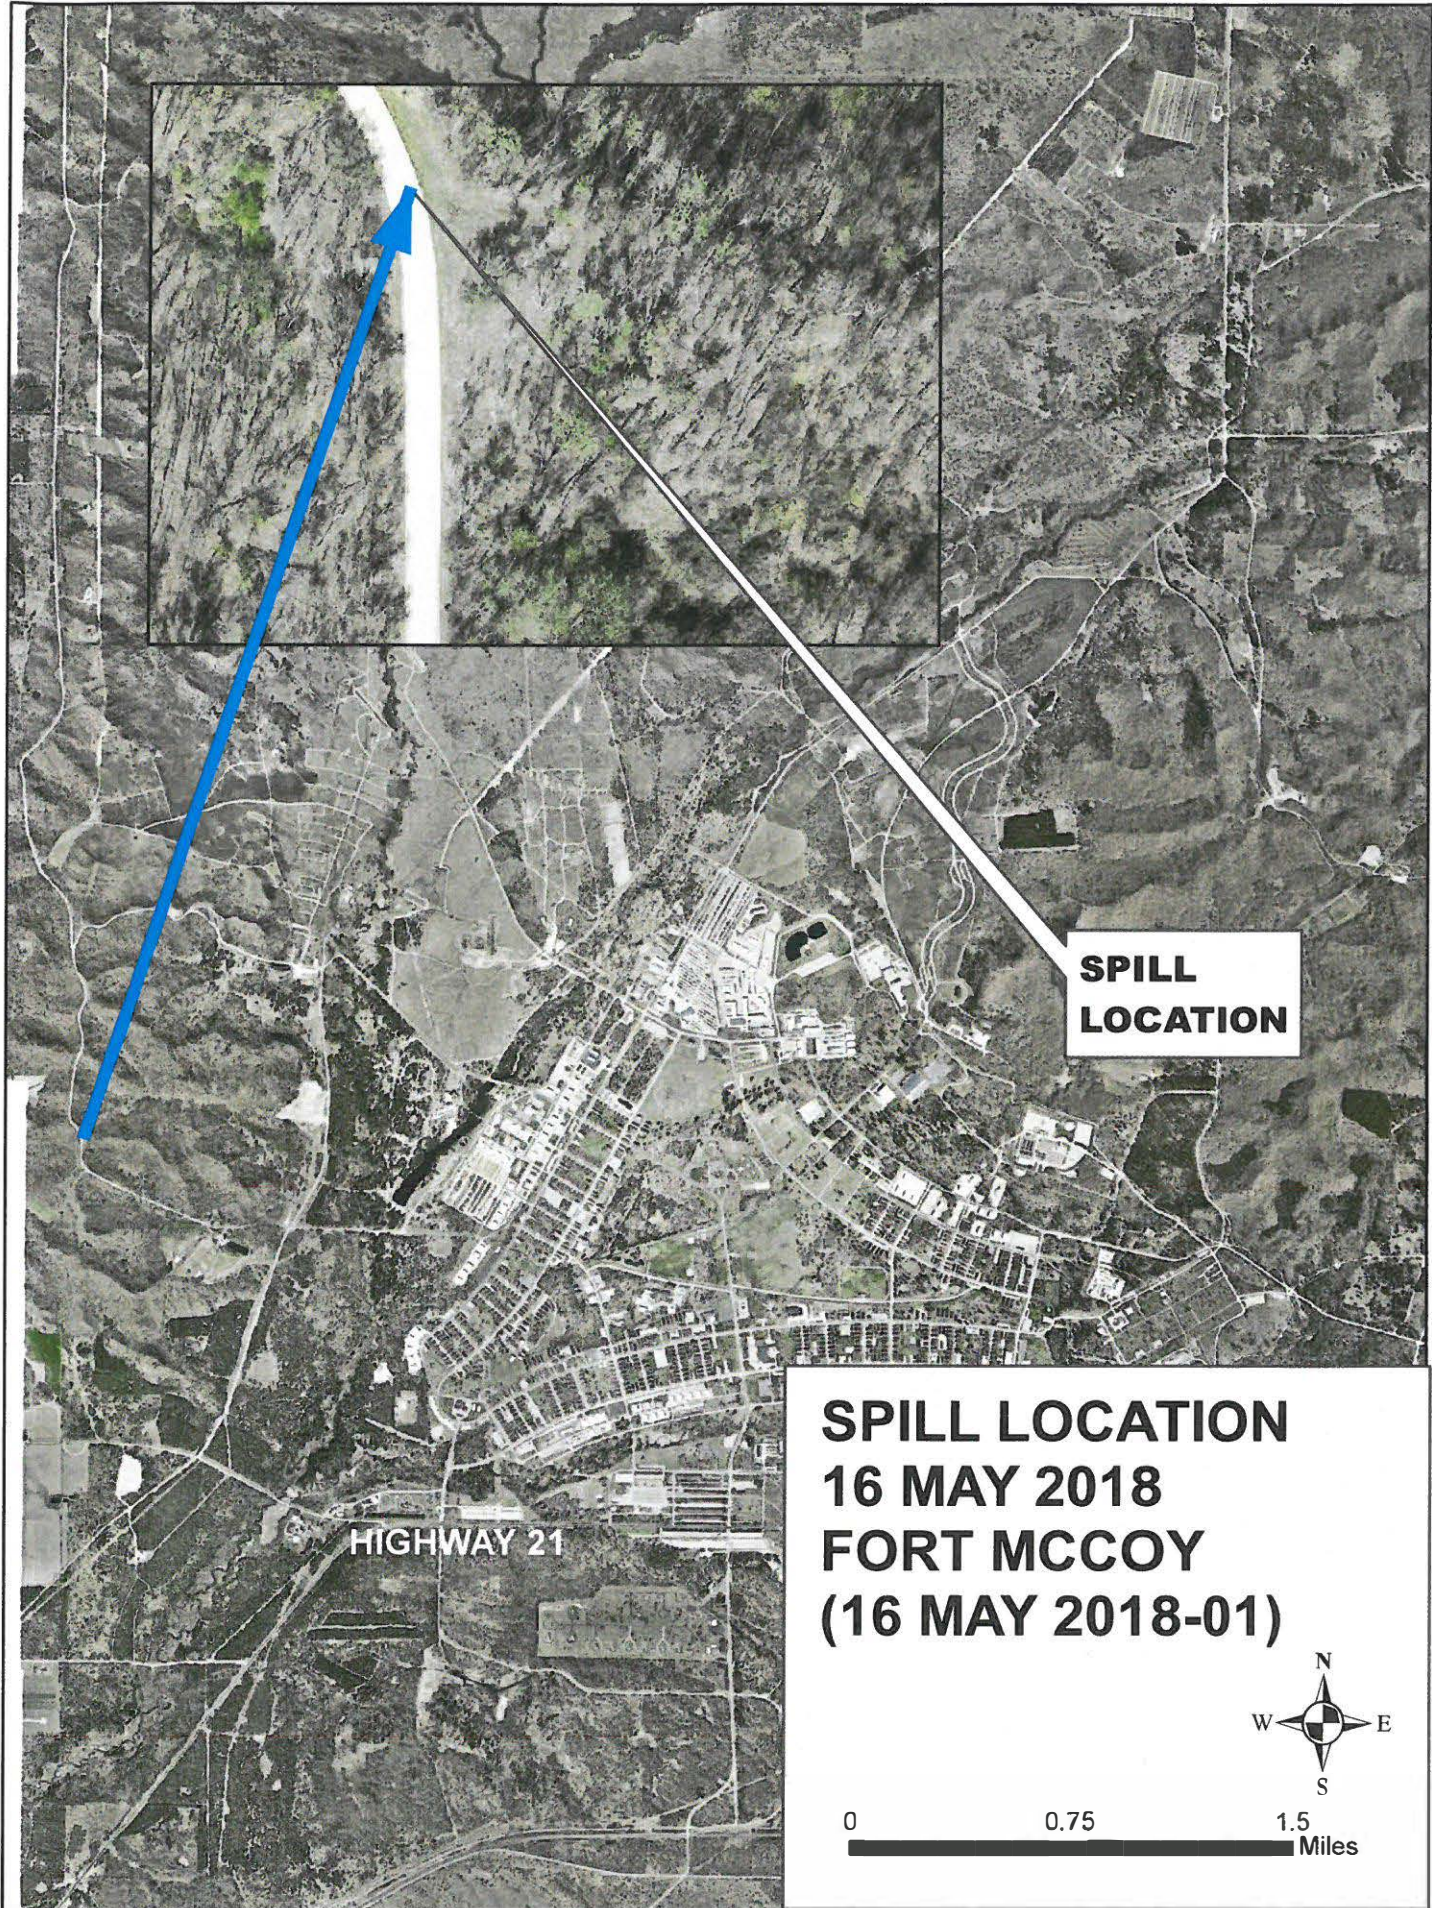

BRIEF DESCRIPTION OF INCIDENT:
The material spilled was F-24. It appears that between 20 and 25 gallons were spilled. A HUMVEE caught fire on Burma Road on the big hill about a mile north of the Ski Hill. It appears that all of the fuel in the tank was released. The area of contaminated soil is approximately 225 feet long. At the location of the spill the contaminated soil is 6-8 feet wide, and at the bottom end of the contaminated area it is about 2 feet wide. It appears that the firefighting efforts spread the contamination farther than it would have spread on its own. The contaminated area is along the side of the roadway and in the ditch. Spill was dug up 28JUN18.
