Rationale for No Action Required

Date stamped: 12/22/10

Name and description of site: Petromart #32

Who is submitting and for whom? METCO for site owner

What has been submitted? Tank pull Report

Description of contamination. Petroleumat levels below former UST closure samples-

What is being requested? Change BRRTS # to 09

Conclusions:

BRRTS # 03-30-556623

Signed: Shanna Handblom Date: 4/14/11

Cc: Frances Koonce

09-30-556623

File in County General NAR file

Vicky or Kim,

Please change the above noted BRRTS # to an 09 # for this site. I will put the tank pull Report in the file.

Thank
Shanna

April 20, 2011

Subject: No Further Site Investigation Required
Petro Mart #32
12439 Sheridan Rd.
Pleasant Prairie, WI
FID 230018030, BRRTS 03-30-556623

Dear Mr. Zald:

Purpose

The purpose of this letter is to provide you with clarifications as to environmental liabilities and current environmental conditions at 12439 Sheridan Rd., Pleasant Prairie, Wisconsin ("the Property").

Request

On April 12, 2011 a review of the December 20, 2010 tank removal report and the file for the previous investigation, LUST # 03-30-004576 was performed. This letter is a determination whether further response actions are needed under the ch. NR 700 rule series, Wis. Adm. Code, based on the release or presence of one or more hazardous substances at the Property.

In order for the Department to make this determination, a review of the following documents occurred:
Notification of Release was received December 22, 2010
Letter requesting additional information dated January 18, 2011
Department of Natural Resources file for the previous investigation at the property,
LUST # 03-30-004576

The Department has examined the reports listed above and provides the following summary of the facts of the case and opinions concerning environmental conditions at the Property.

Background and Summary of Environmental Conditions

The site has been an operating gas station for many years and is now closed and the building, tanks and pumps have been removed.

Liability Determination

The Wisconsin Hazardous Substance Discharge Law, s. 292.11, Wis. Stats., commonly called the Spill Law, requires those who cause, possess or control a hazardous substance discharge to "take the actions necessary to restore the environment to the extent practicable and minimize the harmful effects

from the discharge to the air, lands or waters of this state." Section 292.55, Wis. Stats., authorizes the Department to issue clarification letters concerning liability for environmental pollution.

The data summarized above indicates that one or more hazardous substance discharges have occurred on the Property. However, based on the criteria in s. NR 716.05(2), Wis. Adm. Code, the Department has determined that further site investigation activities are not required and that no further response action is required under the ch. NR 700, Wis. Adm. Code, rule series to respond to these identified discharges.

This response letter relates only to those conditions described above, and makes no determination concerning the presence or absence of hazardous substances, other than those identified in the reports listed above. However, based on the Department's review of the aforementioned documents, there is no reason to suspect that other areas of the Property may be contaminated or that other contaminants may be present. Generally, the assessment activities seem adequate given the known scope of contamination and complexity of the site. The information contained in documents submitted to the Department indicates there are minimal to no environmental impacts to soil and/or groundwater associated with the process area at the Property.

In the future, if the Department becomes aware of new information concerning the contaminants referenced above, or the presence of other contaminants on the Property not previously identified, the Department will need to evaluate that data to determine if response actions may be required. Whenever possible, the Department requires the person who caused the discharge to take the appropriate response actions.

The Bureau for Remediation and Redevelopment Tracking System (BRRTS) identification number for this activity is shown at the top of this letter. The Department tracks information on all determinations such as this in a Department database that is available on the Internet at <http://dnr.wi.gov/org/aw/rr/>. See "BRRTS on the web" under "Contaminated Land Databases". Since there is no action required for this case, the Department has issued BRRTS case number 09-30-556623 and will track this site activity as a "No Action Required" determination.

If you have any questions, please contact me at 262-884-2341, by writing to the address at the top of this letter or by email to shanna.laube-anderson@wisconsin.gov.

Sincerely,

Shanna L. Laube-Anderson

Dear Mr. Schneider,

Enclosed is our "Tank System Site Assessment" report concerning the removed tank system at the Petro Mart #32 in Pleasant Prairie, Wisconsin. This document presents the procedures, methods, observations, and documentation used to conduct such a project.

A copy of this report will be sent to the WDNR.

We appreciate the opportunity to be of service to you on this project. Should you have any questions or require additional information, do not hesitate to contact me at our La Crosse office.

Sincerely,

Ronald J. Anderson, P.G.
Senior Hydrogeologist/Project Manager

**Tank System Site Assessment Report - METCO
Petro Mart #32**

INTRODUCTION

METCO was retained to perform a Tank System Site Assessment (TSSA) at the Petro Mart #32 property in Pleasant Prairie, Wisconsin. The purpose of this site assessment was to: 1) Document the tank system removal, 2) Determine if petroleum products have spilled or leaked into the environment, and 3) Determine if additional investigations are needed. This report presents the data and results of this assessment.

SCOPE OF SERVICES

Duties included collecting background information, field observations, laboratory analysis of collected soil samples, and subsequent report generation. All work was done in accordance with the Wisconsin Department of Commerce (WDCOMM) and the Wisconsin Department of Natural Resources (WDNR) approved methods.

**Tank System Site Assessment Report - METCO
Petro Mart #32**

SITE INFORMATION

Site Address

12439 Sheridan Road, Pleasant Prairie, Wisconsin

Tank Closure

On December 2-3, 2010, two underground storage tank systems (12,000 and 10,000 gallons), including associated pump islands and piping, were removed by WRR and their subcontractors (DKS and Advanced Tank Service). The tanks and piping were constructed of fiberglass. Upon inspection, the tanks and piping showed no evidence of cracks, holes, or leaks.

OBSERVATIONS

Soil Type

Native soils ranged from a brown to gray silt/clay to a brown till.

Groundwater was not encountered, but is expected to exist 10-12 feet below ground surface.

Bedrock was not encountered.

Results

A total of 11 soil samples (labeled SA-1 through SA-11) were collected for laboratory analysis (GRO/PVOC/Naphthalene). The samples below the UST systems were collected at approximately 12-13 feet below surface and the samples below the piping and pump islands were collected at approximately 4-5 feet below ground surface. None of the collected soil samples showed any obvious evidence of petroleum odors or staining. Samples that showed laboratory detections included SA-1, SA-5, SA-6, and SA-9. The specific values can be found on the attached laboratory report and Form ERS-8951.

Soil Sampling

The soil samples were collected for laboratory analysis with as little disturbance and exposure to the air as possible.

Using a clean shovel and gloved hand, the soil samples were collected and placed in a laboratory specified, clean, clear, glass container with a screw on, Teflon lined caps. The collected samples were packed in a cooler containing ice and delivered to Synergy Environmental Labs located in Appleton, Wisconsin.

Tool Cleaning Methods

No sampling tools were cleaned on-site and no wastewater produced.

**Tank System Site Assessment Report - METCO
Petro Mart #32**

CONCLUSIONS

According to the WDNR, if a collected soil sample tests more than 10 ppm for GRO or DRO, the current owner/operator of the facility is required to determine the complete extent of the contamination released from their tank system and possibly clean it up.

Since four of the collected samples showed laboratory detects, it is possible that the removed systems released petroleum products into the environment. However, it must be noted that since this is a former Leaking Underground Storage Tank site, it is also possible the detected contaminants are due to past releases.

STANDARD OF CARE

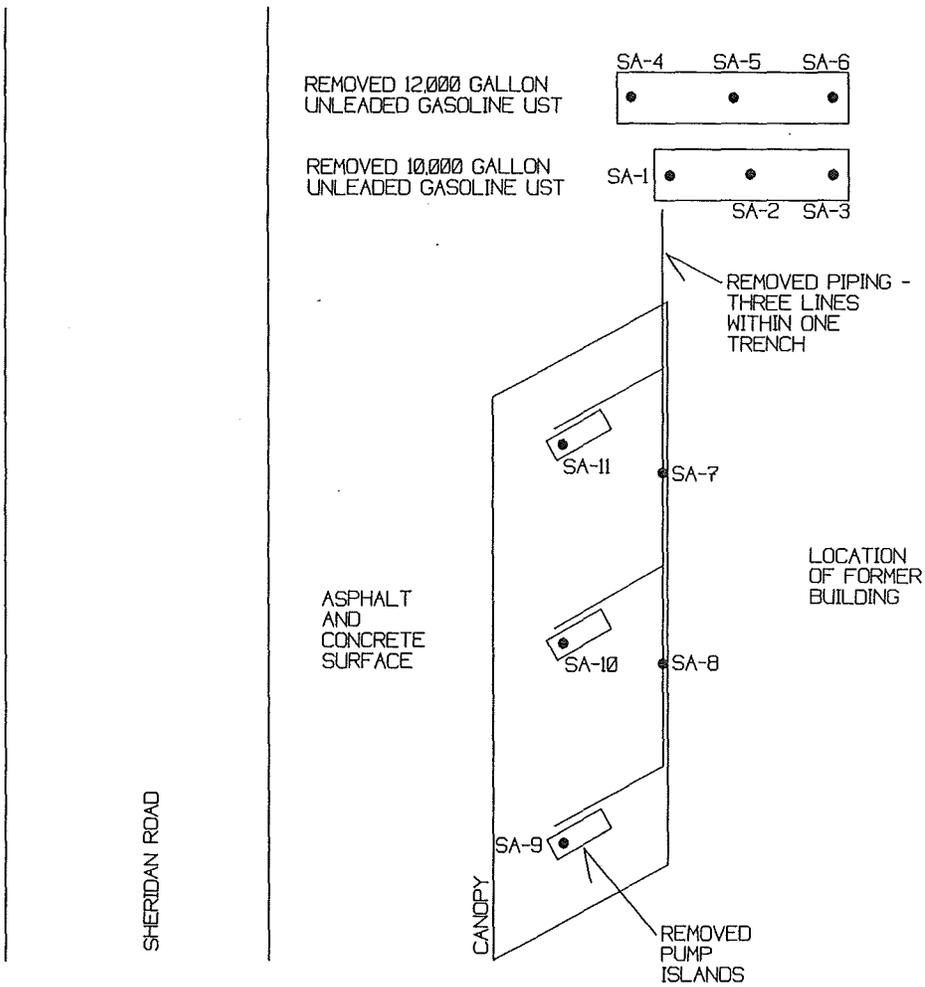

The analysis and conclusions expressed in this report are based upon data obtained from the subsurface evaluation at the indicated locations and from other information discussed in this report. Actual subsurface conditions may vary and may not become evident without further assessment.

The conclusions and recommendations contained in this report represent our professional opinions. All work conducted by METCO is in accordance with currently accepted hydrogeologic and engineering practices and they neither imply nor intend warranty.

We appreciate the opportunity to be of service to you. If you have any questions or require additional information, please do not hesitate to contact us.

**Tank System Site Assessment Report - METCO
Petro Mart #32**

Appendix C/ State Form ERS - 8951

Part B – To be completed by environmental professional

Submit original Part B to the WDNR along with a copy of Part A

TANK-SYSTEM SITE ASSESSMENT (TSSA)

Site Name: Petro Mart #32
 Address: 12439 Sheridan Road, Pleasant Prairie WI
 Note: Site name and address must match with Part A Section 1.

To determine if a TSSA is required, see Comm 10 and section II part B of ASSESSMENT AND REPORTING OF SUSPECTED AND OBVIOUS RELEASES FROM UNDERGROUND AND ABOVEGROUND STORAGE TANK SYSTEMS.

If a TSSA is required, then follow the procedures detailed in ASSESSMENT AND REPORTING OF SUSPECTED AND OBVIOUS RELEASES FROM UNDERGROUND AND ABOVEGROUND STORAGE TANK SYSTEMS.

1. Site Information

- a. Has there been a previously documented release at this site? Y N
 If yes, provide the Commerce # 53143-7911-39, or DNR BRRT's # 03-30-004576
- b. Number of active tanks¹ at facility prior to completion of current services USTs 2 ASTs 0
 (NOTE 1: Do not include previously closed systems or system components.)
- c. Excavation/trench dimensions (in feet). (Photos must be provided.)

EXCAVATION/TRENCH #	LENGTH	WIDTH	DEPTH
<u>#1</u>	<u>45'</u>	<u>30'</u>	<u>12'</u>

2. Visual Excavation/Trench Inspection (Photos must be provided for "Yes" responses, except item b.)

Do any of the following conditions exist in or about the excavation(s)?

- a. Stained soils: Y N
- b. Petroleum odor: Y N
- c. Water in excavation/trench: Y N
- d. Free product in the excavation/trench: Y N
- e. Sheen or free product on water: Y N

3. Geology/Hydrogeology

- a. Depth to groundwater 210-12' feet
- b. Indicate type of geology? Till
 (Note 2: Use these symbols individually or in combination as appropriate: C = Clay, SLT = Silt, S = Sand, Gr = Gravel)

4. Receptors

- a. Water supply well(s) within 250 feet of the facility? Y N If yes, specify _____
- b. Surface water(s) within 1000 feet of the facility? Y N If yes, specify _____

5. Sampling

- a. Follow the procedures detailed in ASSESSMENT AND REPORTING OF SUSPECTED AND OBVIOUS RELEASES FROM UNDERGROUND AND ABOVEGROUND STORAGE TANK SYSTEMS.
- b. Complete Tables 1 and 2 as appropriate. (Attach chain-of-custody and laboratory analytical reports.)
- c. Attach a detailed map of site features and sample locations.

J. NOTE RELEVANT OBSERVATIONS, SPECIFIC PROBLEMS OR CONCERNS BELOW

K. TANK-SYSTEM SITE ASSESSMENT INFORMATION

- As a tank-system site assessor certified under Wis. Admin. Code section Comm 5.83, it is my opinion that there is no indication of a release of a regulated substance to the environment.
- Sampling at the site indicates there has been a release to the environment. Pursuant to Wis. Admin. Code section Comm 10.585 (2) (a) and Wis. Stats. section 292.11 (2) (a), the owner or operator or contractor performing work under chapter Comm 10 shall immediately report any release of a regulated substance to the Wisconsin Department of Natural Resources. Failure to do so may result in forfeitures of a minimum of \$10 and a maximum of \$5000 for each violation under Wis. Stats. section 101.09 (5). Each day of continued violation and each tank are treated as separate offenses.

12.02.2010 13:22

January 18, 2011

Mr. Jamal Zald
6650 W. 183rd St.
Tinley Park, IL 60477

SUBJECT: Letter to request additional information for the Petro Mart #32 property, 12439 Sheridan Road, Pleasant Prairie, WI
WDNR FID#230018030 BRRTS#03-30-556623

Dear Mr. Zald:

On December 22, 2010, Ron Anderson, METCO, on your behalf, notified the Wisconsin Department of Natural Resources (WDNR) that petroleum contamination had been detected in soil at the site listed above during removal of two underground storage tank systems. The Department has issued case tracking number 03-30-556623 for this reported release.

A petroleum release at this property from a leaking underground storage tank (LUST) system was previously investigated, remediated and closed out by the Department on January 26, 2004 (WDNR BRRTS#03-30-004576). Because residual contamination from the closed out LUST may remain on this property, the Department cannot determine whether the newly reported contamination is a remnant of the former LUST case or is the result of a new release. This letter is to notify you that the following additional information is required to be submitted to the WDNR before the Department can determine whether or not you should proceed with a site investigation under NR 716, Wis. Adm. Code to investigate a new release. The submittal of the following information may allow the Department to conclude that no further action is required at the site described above.

- Please provide a discussion of the use of the property since closure of the LUST case in 2004. Has this been an active service station? What is the current disposition of the property? When was the former gas station building removed?
- Provide UST information. When were the recently removed USTs installed? What were the contents of the tanks? The Wisconsin Department of Commerce (Commerce) tank database indicates that the tanks were empty.
- Based on figures from the former investigation, it appears that the location of the newer USTs may be located in the area of the remedial excavation conducted in 1995. Verify the location of the newer USTs relative to the former tanks location/remedial excavation.
- How do the locations and depths of the recently collected tank closure soil samples correlate to former investigation and remediation samples? Are contaminant concentrations consistent with historic data?

We suggest that you hire an environment consultant to obtain the requested information and to provide an assessment of whether the reported release is new or old and whether additional investigation or remediation is needed. **Please provide the requested information to me at the letterhead address within 60 days after the date of this letter, so that we can determine the disposition of this site.**

Information related to the closed LUST case file can be reviewed at the Sturtevant Service Center. Please contact Shanna Laube-Anderson (262) 884-2341 to schedule a review. A limited amount of information related to the closed LUST is also available at the Department's GIS Registry of contaminated properties at <\\central\efiles\SER\Kenosha\03 LUST\0330004576\0330004576.pdf>.

Please contact me at (414) 263-8533 with any questions or concerns regarding this letter.

Sincerely,

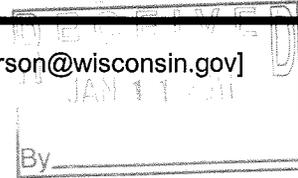

Nancy D. Ryan, Hydrogeologist
Remediation and Redevelopment

Subject: RE: BRRTS Activity 03-30-004576

Jan,
If there was a new release then you need to submit the tank pull report with lab data and a release notification form to either Victoria Stovall or Kimberly Smith in the Milwaukee office and they will determine if a new site needs to be opened for this one. When you do that include the previously assigned FID number so that they know it is already in the system and make sure you use the same address that we have in BRRTS or a totally new FID and BRRTS could be assigned and that is just a logistical nightmare to get that corrected.
Thanks.

To: Laube-Anderson, Shanna L - DNR
Subject: BRRTS Activity 03-30-004576

Shanna,

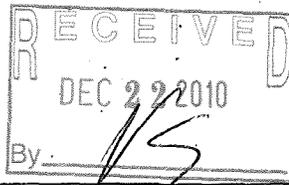

WRR recently completed a tank removal project located in Pleasant Prairie, WI for the Wisconsin Department of Commerce (COMM). As part of the project, METCO conducted a Tank System Site Assessment (TSSA) Report. COMM has instructed us to send the original TSSA to the "respective DNR office". I noticed on the BRRTS system that this site is currently closed out. The soil sampling did detect some elevated PVOC's under one of the tank beds.

Should we send the TSSA to you?

Thanks,

Jan Smit
Compliance Director
WRR Environmental Services Co., Inc.
5200 Ryder Road
Eau Claire, WI 54701
Phone: 715-834-9624 X- 8780
Direct: 715-852-1630
Cell: 715-563-7907
FAX: 715-836-8785
jsmit@wrres.com

Shanna, Enclosed is the TSSA report. COMM asked that we send this to you. WRR removed the 2 tanks as the contractor to COMM (Sheldon Schall) under P.O. 00A000426 OR Bid 139521. WRR can not help with the issue of if the details are new OR old.
Jan Smit 1/3/11

**Notification For Hazardous Substance Discharge
(Non-Emergency Only)**

Form 4400-225 (06-08) Page 1 of 2

FID# 230018030
BRTSH 03-30-556623

Emergency Discharges / Spills should be reported via the 24-Hour Hotline: 1-800-943-0003

Notice: Hazardous substance discharges must be reported immediately according to s. 292.11 Wis. Stats. Non-emergency hazardous substance discharges may be reported by telefaxing or e-mailing a completed report to the Department, or calling or visiting a Department office in person. If you choose to notify the Department by telefax or by email, you should use this form to be sure that all necessary information is included. However, use of this form is not mandatory. Under s. 292.99, Wis. Stats., the penalty for violating the reporting requirements of ch. 292 Wis. Stats., shall be no less than \$10 nor more than \$5000 for each violation. Each day of continued violation is a separate offense. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than program administration. However, information submitted on this form may also be made available to requesters under Wisconsin's Open Records Law (ss. 19.31 - 19.39, Wis. Stats.).

Confirmatory laboratory data should be included with this form, to assist the DNR in processing this Hazardous Substance Release Notification.

Complete this form. **TYPE or PRINT LEGIBLY.** NOTIFY appropriate DNR region (see next page) **IMMEDIATELY** upon discovery of a potential release from (check one):

- Underground Petroleum Storage Tank System
- Aboveground Petroleum Storage Tank System
- Dry Cleaner Facility (DERP eligibility based on: Facility owner/operator Property owner of licensed facility)
- Other - Describe: _____

6. Federal Energy Act Requirements (Section 9002(d) of the Solid Waste Disposal Act (SWDA))

For all UST's please provide the following information:

Quantity	Source	Quantity	Cause
<input checked="" type="checkbox"/>	Tank	—	Spill
—	Piping	—	Overfill
—	Dispenser	—	Corrosion
—	Submersible Turbine Pump	—	Physical or Mechanical Damage
—	Delivery Problem	—	Installation Problem
—	Other (specify): _____	—	Other (does not fit any of above)
		<input checked="" type="checkbox"/>	Unknown

Lab results: Lab results will be faxed upon receipt Lab results are attached

Additional Comments: Include a brief description of immediate actions taken to halt the release and contain or cleanup hazardous substances that have been discharged.

Please note that this is a closed UST site (03-30-004576) and it is not known if the lab detects are from the removed system or past contamination

Contact information to report non-emergency releases in DNR's five regions are as follows:

- Northeast Region (FAX: 920-662-5197); Attention -- R&R Program Associate: DNRRNER@wisconsin.gov**
 Brown, Calumet, Door, Fond du Lac (except City of Waupun - see South Central Region), Green Lake, Kewaunee, Manitowoc, Marinette, Marquette, Menominee, Oconto, Outagamie, Shawano, Waupaca, Waushara, Winnebago counties
- Northern Region (FAX: 715-623-6773); Attention -- R&R Program Associate: DNRRRNOR@wisconsin.gov**
 Ashland, Barron, Bayfield, Burnett, Douglas, Forest, Florence, Iron, Langlade, Lincoln, Oneida, Polk, Price, Rusk, Sawyer, Taylor, Vilas, Washburn counties
- South Central Region (FAX: 608-275-3338); Attention -- R&R Program Associate: DNRRRSCR@wisconsin.gov**
 Columbia, Dane, Dodge, Fond du Lac (City of Waupun only), Grant, Green, Iowa, Jefferson, Lafayette, Richland, Rock, Sauk counties
- Southeast Region (FAX: 414-263-8550); Attention -- R&R Program Associate: DNRRRSER@wisconsin.gov**
 Kenosha, Milwaukee, Ozaukee, Racine, Sheboygan, Walworth, Washington, Waukesha counties
- West Central Region (FAX: 715-839-6076); Attention -- R&R Program Associate: DNRRRWCR@wisconsin.gov**
 Adams, Buffalo, Chippewa, Clark, Crawford, Dunn, Eau Claire, Jackson, Juneau, LaCrosse, Marathon, Monroe, Pepin, Pierce, Portage, St. Croix, Trempealeau, Vernon, Wood counties

Please copy me on the RP letter.

Sample Date 12/2/2010

	Result	Unit	LOD	LOQ	Dil	Method	Ext Date	Run	Analyst	Code
1,2,4-Trimethylbenzene	<25	ug/kg	3.4	11	1	GRO95/8021	12/10/201		CJR	1
1,3,5-Trimethylbenzene	<25	ug/kg	2.5	7.9	1	GRO95/8021	12/10/201		CJR	1
m&p-Xylene	<50	ug/kg	6.2	20	1	GRO95/8021	12/10/201		CJR	1
o-Xylene	<25	ug/kg	7.9	25	1	GRO95/8021	12/10/201		CJR	1

"J" Flag: Analyte detected between LOD and LOQ

LOD Limit of Detection

LOQ Limit of Quantitation

Code	Comment
1	Laboratory QC within limits.

All solid sample results reported on a dry weight basis unless otherwise indicated. All LOD's and LOQ's are adjusted for dilutions but not dry weight. Subcontracted results are denoted by SUB in the analyst field.

Note: Data obtained from monitoring well MW-1 was not used for groundwater elevation data because it is believed that backfill surrounding gas tank is affecting the groundwater level in this well.
