1. AECOM is preparing a work plan for submittal to Josh Schoeman, DPW. The limited site investigation will include three to four soil borings/temporary monitoring wells in the area of the former tank bed to assess the petroleum impacts to the subsurface.
2. Soil and groundwater samples will be submitted for PVOC and DRO analysis.
3. Closure will be requested when the limited site investigation is complete.
4. Estimated Timeline for Closure = 6 months from today.

1. I have reviewed the site investigation data for this property. In my opinion, the site would be awarded closure via entry on the GIS Registry for residual impacts to groundwater.
2. Estimated Timeline for closure submittal = 4 months from today.

Please let me know if you have any questions Tom, Thank you.
