Re: LIME KILN PARK - GROUNDWATER SEEPS - FYI

KEN TULLISTON, LARRY LUECK (OF EPA) and MYSELF

WALKED THE STONE OF MILW. RIVER ALONG LIME KILN + ALSO

UP THE SMALL STREAM + POND IN CENTER OF SITE.

ONLY 1 GROUNDWATER SEEP WAS FOUND ON BANK OF RIVER.

IT WAS CLEAR AND NOT TYPICAL OF LEACHATE (NOT REDDISH etc.)

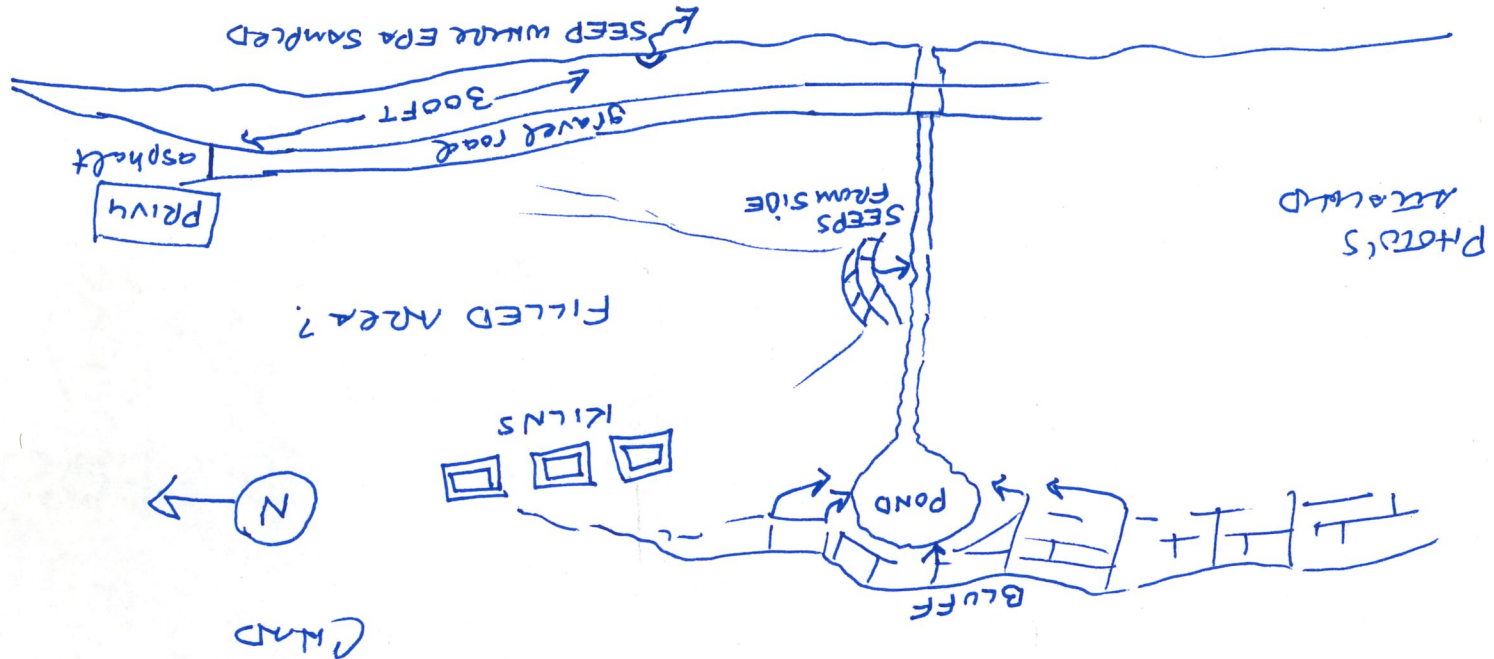

THE POND IS FRO ABOUT 90% BY SPRINGS IN BLUFF TO WEST

OF FILL AREA. SOME SIDE-GRADIENT SEEPS - ALSO CLEAR - WERE

FOUND INTO THIS RIVLET.

KEN TULLISTON - EPA collect a single sample for metals

analyses from seep along MAKE RIVER BANK.
