Subject: RE: Proposed well location

Good morning John,

We finished two years of monitoring at the end of the 2013. I contracted with the Village this spring, and I have approval/dollars to complete the RI report. We will work on that through May and June, probably with a deliverable in July/August.

As far as the sampling, everything remains the same; high levels of VOCs in the park, all downward trends except one well in Manchester subdivision. The downgradient private wells have completely cleaned up now, there are no trace VOCs at all.

I hope all is well with you; we'll be in touch soon about the report.

BJ
