Tim- submittal is appropriate if the vapor issues are addressed. I can't guarantee that the case will close but vapor was the only concern the committee had when they looked at the site.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Morning Matt,

Please confirm that Case Closure submittal is appropriate, assuming the vapor bullit below is addressed.

Second, we'd like to submit a reimbursement claim, but I heard that the DERF fund is in trouble and that reimbursement requests are no longer being accepted-is that true?

Thanks,

Timothy P. Welch, P.G.

Tim- I was able to present this site to the closure committee and received the following feedback:

Soil: appears to be defined to the extent practicable

Groundwater: appears to be defined, plume is stable

Vapor: the sewer sample looks fine but despite the clean indoor air samples the closure committee was very concerned about the sub-slab vapor concentrations. In order to close they would like see either a vapor mitigation system installed or two rounds of sub-slab samples showing that vapor concentrations are below the VRSL appropriate for the building use- if it has been converted to residential or will be then residential standards will apply.

Let me know if you have questions. Thanks,
Matt

Hi Matt,

Attached for your review/comment is a Data Transmittal for the supplemental investigation work performed in December 2019.

We are requesting Department concurrence that Case Closure is warranted.

Please let us know if you need a hard copy mailed, and/or a copy uploaded to the portal.

Regards,

Timothy P. Welch, P.G.
