Dear Mr. Cass:

On March 21, 2016, the Wisconsin Department of Natural Resources (DNR) reviewed the March 18, 2016 letter report titled *Results of Further Off-site Vapor Sampling* from Environmental Forensic Investigations, Inc. for case described above. Based on the results of the most recent vapor sampling from the off-site monitoring wells, the DNR has determined that the Site Investigation is now complete.

Additional on-site vapor sampling may be required depending the results of future remedial actions. Also additional soil borings and/or monitoring wells may be necessary if the contaminant plume is found to be migrating in the future.

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this letter or the case, please contact me at the letterhead address, by calling (262) 574-2166, or by e-mail at david.volkert@wisconsin.gov.

Sincerely,

David G. Volkert, P.G.
Hydrogeologist
