DNR BRRTs Activity # 02-41-551923
FID # 241287640

Dear Mr. Cass:

The Wisconsin Department of Natural Resources (DNR) has completed the review of the above report dated January 19, 2016 prepared by Environ Forensic Investigations, Inc. (Environ Forensics) on your behalf. The DNR approved this Site Investigation (SI) on 02/20/2018. In approving this SI, the DNR requests that soil sampling should be done east of DP-13 towards the shed area and the area south of boring HA-I to further define the extent of the soil contamination on-site. As you plan to do a full scale SVE remediation, please include the sampling of the soils in areas requested above.

The DNR appreciates the actions you are taking to restore the environment at this site. If you have any further questions, please call me at 414-263-8607.

Sincerely,

Binyoti F. Amungwafor
Hydrogeologist
