Hi Donald,

We have reviewed the information that you have provided and consider the NON complete. Please ensure that you continue to have your on-site manager review and document the vapor mitigation system. It is also recommended that they become aware of any other requirements for the property which were made during the closure review. These requirements can be found in the closure documents which are available to the public by doing a site search in our BRRTS database system. I also am including a link to our vapor documentation form to use going forward. It will be required as proof of the functioning and documentation of the vapor mitigation system in the future. It can be found here: <https://dnr.wi.gov/files/PDF/forms/4400/4400-321.pdf>

If you have any other questions or concerns, please feel free to contact me. Thank you!

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Barb Flietner

Good morning,

Attached are the Subslab inspection reports, as well as photos of the North and South U-tubes and power switches.

Please let us know if you require anything further to bring us into compliance.

I've cc'd our manager and POC, Deborah Wickham-Keller, who handles the inspections and documentation, as well as daily operations.

To ensure a more timely response, please use the business mailing address for future correspondence via USPS:

1727 S Main St

Rice Lake, WI 54868
