Date: Tuesday, July 21, 2020 3:08:55 PM

Binyoti,

The same chemicals and processes as previously approved are to be used in the renewed permit. The volume is also the same as previously approved. Nothing has changed except the date was delayed due to cold weather and Covid / economic issues.

Thanks,

Ken

Ken:

I just realized that you needed to have summarized the request for the extension of the injection, say the use of same previously injected chemicals and volume or other chemicals. I still need this information to issue an extension in retrospect given this might have been done. I agreed to issuing the extension.

Thanks

Binyoti

Binyoti,

Any progress on extending the permit?

Thanks –

Ken

Binyoti,

I got your phone message – the start date for the chemical treatment / injection is July 13 2020.

Let me know if you need further details or information, and thanks for the quick reply –

Have a great July 4th!

Ken

Binyoti,

The remedial action at the Shorewood Cleaners site is scheduled to begin July 13, 2020 when the chemical mixing firm arrives. At that time, we will start the in-situ mixing of Fenton's Reagent and a carbon amendment in the excavation. There is no pressure injection – just spray on liquids and solids, followed by backhoe bucket mixing / excavation.

I have obtained the attached Exemption from the WDNR dated June 12, 2019.

I noted that one of the conditions of the exemption is that it expires one year from the date of issuance which was June 12, 2020.

Due to the very cold November, and then Covid, we could not begin the project within one year of the date of the letter.

Can we get an email or letter from you that will extend the existing Exemption for another 90 days – to September 12, 2020? We should be done with the project by the end of July 2020, but a three month extension would give us a little more leeway if needed.

Thanks,

Ken
