**Re: Groundwater Sampling Results Report
Former One Hour Martinizing
13405 Watertown Plank Road, Elm Grove, Wisconsin
BRRTS# 02-68-552102**

Dear Mr. Moll:

EnviroForensics, LLC (EnviroForensics) is providing the results of recent groundwater sampling. Samples of groundwater were collected from all site groundwater monitoring wells during December 7-8, 2023. The locations of all site groundwater monitoring wells are shown on attached **Figure 1**. The direction of groundwater flow has been historically consistent to the southeast as seen on **Figure 1**.

The groundwater samples were analyzed for total volatile organic compound (VOCs) using EPA Method 8260. In addition, the samples were analyzed for total organic carbon (TOC), methane, ethane, and ethene and field parameters were collected to help determine the continued degree of microbial degradation following remedial injections performed in 2018.

As can be seen in **Table 1** and the attached laboratory results report, concentrations of tetrachloroethene (PCE) and trichloroethene (TCE) have been reduced over time to below groundwater enforcement standards (ES). TCE was detected at a concentration exceeding the groundwater preventative action limit (PAL) in well MW-5, only. The concentrations of cis-1,2 dichloroethene (DCE) have decreased in source area wells MW-5, MW-6, and MW-7 with the concentration of DCE in well MW-5 above the PAL and the concentration of DCE in wells MW-6 and MW-7 remaining above the ES. The concentration of vinyl chloride in source area wells MW-5 and MW-6 continue to decrease while the concentration of vinyl chloride in well MW-7 has increased due to continued reductive de-chlorination of DCE at that location.

Continued reduction of TCE and DCE is anticipated due to the existing favorable conditions for reductive de-chlorination as exhibited by negative oxidation reduction potential values, low oxygen measurements, and high methane concentrations presented in **Table 1**. The plume is stable and has not migrated to the southeastern property boundary over the course of sub-surface

investigations dating back to 2009 as exhibited by unaffected down-gradient property boundary well MW-4.

If you have questions regarding the content of this report, please feel free to contact me at 262-490-6472 or wfassbender@enviroforensics.com.

Sincerely,
EnviroForensics LLC

"J" Flag: Analyte detected between LOD and LOQ

LOD Limit of Detection

LOQ Limit of Quantitation

Code **Comment**

1 Laboratory QC within limits.

SLA denotes sub contract lab - Certification #999888890

All solid sample results reported on a dry weight basis unless otherwise indicated. All LOD's and LOQ's are adjusted for dilutions but not dry weight. Subcontracted results are denoted by SUB in the analyst field.
