Hi Jacob,

The construction year of those plans are from 2010, but the sanitary sewer was never replaced during that time. If you see on the plans the sanitary is not under construction. The sanitary is from 1977 and is ABS TRUS material. Inverts and sizes are listed on the plan set.

Thanks,

Aaron

Hi Aaron – I would like to confirm with you construction/replacement date for the sanitary sewer along W Wisconsin Ave, between Division and Superior Streets. The plans are dated, and there are also hand-drawn notes

I am particularly interested in the sewer shown on plans “SA-2297” and “SA-2298”. There is a “drawn” date for the plan sheets of 12/21/09 and also a hand drawn “checked by KWC” date of 1/21/2011. Are either of these the construction date? I’m sorry, I am not an engineers and do not deal with these types of plan drawings often. Thanks for your help!

Hi Jacob,

The as-builts I sent over have all size, material, inverts, rim elevations and locations for most of the questions you have in your email. Date of construction is also listed. Bedding was in stone. Sanitary manhole lids were not vented. Televising was done in 2010, 2015, and 2022. We have no data for soil sampling or liquid levels. Sewer cleaning is usually done once a year internally.

If you have any other questions just let me know.

Thanks,

Aaron

Hello again Aaron,

Thanks again for sending the as-builts.

We also have some other info to request. I understand if the City does not have some of this information, but it was specifically requested by Wisconsin DNR and we need to attempt to gather as much info as possible. Can you please look into the items below for the section of sewer along W. Wisconsin Ave between N. Superior St and N. Division St? Please comment "No info/records available" or something similar if that is the case for any items.

- Dates of construction/repair work:
- Pipe material and size:
- Location of drop structures:
- Bedding materials:
- Locations and dates of laterals (existing and abandoned) along W. Wisconsin Ave between N. Superior St and N. Division St.:
- Manhole Lid type (vented or non-vented) for sanitary manholes along W. Wisconsin Ave between N. Superior St and N. Division St.:
- History of cleaning or video-logging:
- Results of any soil sampling:
- Estimated variation in liquid elevation and flow velocity in area:
- Cleaning schedule:

Please feel free to forward this request to anyone at the City who may be able to help. I would be happy to chat on the phone with you or anyone else if there are any questions. Really appreciate the help!

Thanks again,

Thanks very much, Aaron. I will follow up with Mark on a separate email, so as not to clog your inbox. I will reach out if there any questions about the materials you sent over, but they look to be just what we needed.

Hi Jake,

Here are the as-builts for Wisconsin Ave. If you have any questions about the as-builts feel free to contact me. As for the Sanitary manhole access you can inquire with Mark Lahay the Assistant City Engineer. I have copied him in on this email as well.

Thanks,

Aaron Lehmkuhl
