Subject: Vapor Monitoring Report – 2019-2020  
Laundry Land Cleaners (former), Northgate Shopping Center  
1131 N. Sherman Avenue, Madison, Wisconsin  
WDNR BRRTS #02-13-552183

Dear Ms. Koepke:

On behalf of Northgate Partnership, SCS Engineers (SCS) is providing the following Vapor Monitoring Report for the Dry Cleaner Environmental Response Fund (DERF) project at the Laundry Land Cleaners site. A report dated July 7, 2020 provides results of soil and groundwater investigations conducted in 2019 and 2020.

## 1.0 VAPOR SAMPLING & ASSESSMENT

On August 21-22, 2019, SCS conducted vapor testing at:

- 1113 N. Sherman Ave. (Tobacco Outlet)
- 1117 N. Sherman Ave. (Martial Arts)
- 1131 N. Sherman Ave. (Dream Bikes)
- 1133 N. Sherman Ave. (Boomerangs)

The sampling locations are shown on **Figure 1**, and the sampling results are summarized in **Tables 1** and **2**. The laboratory report is included in **Attachment A**. Samples were collected consistent with Wisconsin Department of Natural Resources (WDNR) vapor sampling guidance using 6-liter Summa canisters with 30-minute controllers for sub-slab samples and 8-hour controllers for indoor air samples.

The sampling results from all four locations indicate the presence of trichloroethene (TCE) and/or tetrachloroethene (PCE) in subsurface vapor at concentrations that are greater than the WDNR vapor risk screening levels for small commercial buildings. The chemicals were also detected in an air sample collected in the unoccupied, unused, restricted-access area of the basement below 1117 N. Sherman Ave. (Martial Arts). The concentrations in the air sample were in excess of commercial indoor air vapor action levels.

Additional sub-slab vapor sampling was conducted May 6 – 7 & 21, 2020 at the following locations at Northgate:

- 1137 N. Sherman Ave. (Community Support Network (CSN))
- 1151 N. Sherman Ave., A and B (Community Support Network (CSN))
- 1203 N. Sherman Ave. (Naly's Floral)
- 1205 N. Sherman Ave. (H&R Block)
- 1207 N. Sherman Ave. (Falbo Bros.)
- 1213 N. Sherman Ave. (UPS Store)

Indoor air sampling was conducted at:

- 1219 N. Sherman Ave (FEED Kitchens)

The sampling locations are shown on **Figure 1**, and the sampling results are summarized in **Tables 1** and **2**. The laboratory reports are included in **Attachment A**. Samples were collected consistent with WDNR vapor sampling guidance using 6-liter Summa canisters with 30-minute controllers for sub-slab samples and 8-hour controllers for indoor air samples.

No compounds were detected in the air sample collected at 1219 N. Sherman Ave. (FEED Kitchens). A background air sample was collected concurrently with the indoor air sample; however, the sample was accidentally contaminated at the laboratory so the results were not reported.

All of the May 2020 test results, except for those for 1203 N. Sherman Ave. (Naly's Floral), indicated vapors in the subsurface at concentrations greater than the WDNR screening levels. SCS is proceeding with further evaluation of the vapor distribution and design of mitigation systems as appropriate.

## **2.0 TESTING OF ADJACENT LOCATIONS BY OTHERS**

In March 2019 sub-slab vapor and indoor air testing was conducted at 1113 N. Sherman Ave. (Tobacco Outlet) as part of a Phase 2 Environmental Site Assessment (ESA) conducted for a pending real estate transaction. 1113 N. Sherman Ave. (Tobacco Outlet) and 1111 N. Sherman Ave. (Cash Store) are separate properties and were not owned by the Northgate Partnership. As indicated by a review of City Directories, the Cash Store was a dry cleaners and laundry from about 1963 to 1986 and a potential source of chlorinated volatile organic compound (CVOC) contamination to the subsurface.

The sampling locations are shown on **Figure 1**, and the sampling results are summarized in **Tables 1** and **2**. PCE was detected in a sub-slab vapor sample collected at 1113 N. Sherman Ave. at a concentration that exceeds vapor risk screening levels for small commercial buildings. 1111 N. Sherman Ave. was not sampled for the Phase 2 investigation; however, a sub-slab vapor sample collected in 2012 for the Laundry Land DERF investigation indicated the presence of PCE at a concentration just below the vapor risk screening levels for small commercial buildings.

PCE at a very low concentration was detected in the indoor air sample collected at 1113 N. Sherman Ave. in March 2019 for the Phase 2 ESA.

Ms. Cindy Koepke

Page 3

### **3.0 DREAM BIKE VAPOR MITIGATION SYSTEM INSTALLATION**

The highest concentrations of PCE and TCE were detected in the vapor samples collected below the floor slab of 1131 N. Sherman Ave., the former Laundry Land dry cleaners, currently Dream Bikes.

To address the potential vapor risk, a vapor mitigation system was designed and installed at 1131 N. Sherman Ave. (Dream Bikes) in spring 2020. Because of limited connectivity beneath the slab, vacuum piping for the system was installed in a trench excavated the length of the unit rather than using individual vacuum points for vapor pick-up. The trenching and piping were installed March 14 through 18, 2020. The concrete over the trench was sealed on March 23, 2020. The blower for the system was not immediately available due to the pandemic, but was installed on May 4, 2020. The effectiveness of the system was tested on May 4 through 7, 2020. The test results indicate that the system provides adequate control of sub-slab vapors.

A construction documentation report and a maintenance plan is being prepared for the system.

### **4.0 TENANT AND OWNER NOTIFICATION**

Vapor and air sampling results will be provided to The Alexander Company, Inc., Northside Planning Council (FEED Kitchens), and Northgate Partnership. We assume the property owners will provide the information to affected tenants.

Please contact us at (608) 224-2830 if you have any questions concerning this letter.

Sincerely,

Betty J. Socha, PhD, PG

**Laundry Land Cleaners / SCS Engineers Project #25211374.51**  
 (Results are in ppbv)

N. Sherman Ave. (or as noted)	Business as of March 29, 2018	Sample Name	Date	Lab Notes	cis-1,2-DCE	trans-1,2- DCE	PCE	TCE	Vinyl Chloride
1819 Aberg	Dane County Job Center	Dane County Office Bldg	1/28/2016	--	<3.2	<2.7	520	<1.9	<3.8
		Vapor Risk Screening Level (Small Commercial Buildings)			NE	NE	900	53	370

Abbreviations:

ppbv = parts per billion by volume

NE = No Established Standard

DUP = Duplicate sample

Notes:

1. Samples were collected in 6L summa canisters over 30 minute period and analyzed using the US EPA TO-15 analytical method.
2. Vapor Risk Screening Levels are from Wisconsin Department of Natural Resources' WI Vapor Quick Look-Up Table, which is based on November 2017 USEPA Regional Screening Level Tables.
3. **Bold & underlined** values meet or exceed Vapor Risk Screening Levels for small commercial buildings.
4. March 2019 Tabaco Outlet samples collected by Pioneer Environmental, Inc. Results converted by SCS Engineers from micrograms per cubic meter (ug/m3) to parts per billion by volume (ppbv) using U.S. EPA Indoor Air Unit Conversion calculator ([https://www3.epa.gov/ceampubl/learn2model/part-two/onsite/ia\\_unit\\_conversion.html](https://www3.epa.gov/ceampubl/learn2model/part-two/onsite/ia_unit_conversion.html)) assuming 20 degrees Celsius and 1 atmosphere pressure.

Laboratory Notes:

J = Estimated concentration at or above the Limit of Detection (LOD) and below the Limit of Quantitation (LOQ).

(1) Tetrachloroethene = Analyte concentration exceeded the calibration range. The reported result is estimated.

(2) Trichloroethene = Result may be biased high due to carryover from previously analyzed sample.

(3) Tetrachloroethene = The reported result is from a dilution.

(4) Internal laboratory standard quality control limit exceeded.

(5) These results have been converted to the units shown from the original units of measurement assuming 20 degrees Celsius and 1 atmosphere pressure. Values were not rounded according to EPA rounding rules. THC is quantitated based on the average response factors of several compounds; the nominal molecular weight of THC used for units conversion is the average of the molecular weights of the compounds used for quantitation.

Dear Rob Langdon:

Enclosed are the analytical results for sample(s) received by the laboratory on August 23, 2019. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

## QUALIFIERS

Project: 1133 North  
Pace Project No.: 10488801

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

### LABORATORIES

PASI-M Pace Analytical Services - Minneapolis

### ANALYTE QUALIFIERS

C8 Result may be biased high due to carryover from previously analyzed sample.

E Analyte concentration exceeded the calibration range. The reported result is estimated.

## SUPPLEMENTAL REPORT

May 15, 2020

Rob Langdon  
SCS Engineers  
2830 Dairy Dr.  
Madison, WI 53718

RE: Project: 25211374.51 Laundry Land  
Pace Project No.: 10517488

Dear Rob Langdon:

Enclosed are the analytical results for sample(s) received by the laboratory on May 11, 2020. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Minneapolis

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Kirsten Hogberg  
kirsten.hogberg@pacelabs.com

## QUALIFIERS

Project: 25211374.51 Laundry Land

Pace Project No.: 10517488

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

## ANALYTICAL RESULTS

Client: SCS Engineers  
Phone: 843.746.8525

Lab Sample No: 10517488001  
Client Sample ID: 1207 West

ProjSampleNum: 10517488001  
Matrix: Air

Lab Project Number: 10517488  
Project Name: 25211374.51 Laundry Land

Date Collected: 05/06/20 9:20  
Date Received: 05/11/20 11:10

Parameters	Results	Units	Report Limit	DF	Analyzed	CAS No.	Qualifiers
<b>Air</b>							
TO-15							
cis-1,2-Dichloroethene	<0.05	ppbv	0.35	1.75	05/12/20 21:25 MG2	156-59-2	
Tetrachloroethene	1350	ppbv	21	210	05/13/20 14:21 MG2	127-18-4	
trans-1,2-Dichloroethene	<0.072	ppbv	0.35	1.75	05/12/20 21:25 MG2	156-60-5	
Trichloroethene	0.29	ppbv	0.18	1.75	05/12/20 21:25 MG2	79-01-6	
Vinyl chloride	<0.065	ppbv	0.18	1.75	05/12/20 21:25 MG2	75-01-4	

DISCLAIMER: These results have been converted to the units shown from the original units of measurement assuming 20 degrees Celsius and 1 atmosphere pressure. Values were not rounded according to EPA rounding rules. THC is quantitated based on the average response factors of several compounds; the nominal molecular weight of THC used for units conversion is the average of the molecular weights of the compounds used for quantitation.

trans-1,2-Dichloroethene	<0.079	ppbv	0.37	1.92	05/12/20 20:56 MG2	156-60-5	
Trichloroethene	0.71	ppbv	0.18	1.92	05/12/20 20:56 MG2	79-01-6	
Vinyl chloride	<0.069	ppbv	0.19	1.92	05/12/20 20:56 MG2	75-01-4	

DISCLAIMER: These results have been converted to the units shown from the original units of measurement assuming 20 degrees Celsius and 1 atmosphere pressure. Values were not rounded according to EPA rounding rules. THC is quantitated based on the average response factors of several compounds; the nominal molecular weight of THC used for units conversion is the average of the molecular weights of the compounds used for quantitation.

RE: Project: 25211374.51 Laundry Land  
Pace Project No.: 10518943

Dear Rob Langdon:

Enclosed are the analytical results for sample(s) received by the laboratory on May 22, 2020. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Minneapolis

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Kirsten Hogberg  
kirsten.hogberg@pacelabs.com

## QUALIFIERS

Project: 25211374.51 Laundry Land

Pace Project No.: 10518943

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.
