Subject: Soil and Groundwater Investigation Report  
Laundry Land Cleaners (former), Northgate Shopping Center  
1131 N. Sherman Avenue, Madison, Wisconsin  
WDNR BRRTS #02-13-552183

Dear Ms. Koepke:

On behalf of Northgate Partnership, SCS Engineers (SCS) is providing the following report for the Dry Cleaner Environmental Response Fund (DERF) project at the Laundry Land Cleaners site. This report provides results for soil and groundwater sampling. The scope of work for the soil and groundwater investigation is outlined in DERF Change Order No. 7 dated June 11, 2019. Results of the sub-slab vapor and air investigation outlined in Change Order No. 7 are included in a separate letter report.

## SOIL AND GROUNDWATER SAMPLING

SCS conducted additional investigative work including installation of direct push soil borings and groundwater monitoring to further evaluate the degree and extent of chlorinated volatile organic compounds (CVOCs) in soil and groundwater in the vicinity of the former Laundry Land Cleaners (currently Dream Bikes).

### Soil Investigation

The following work was performed to evaluate the extent of soil contamination at the back (south side) of the former dry cleaners in the vicinity of monitoring well MW-5.

On August 7, 2020, SCS performed the following:

- Advanced 10 direct push borings to about 12 feet below ground surface (bgs). Sample locations are shown on **Figure 1**. Final boring locations and depths were determined based on access limitations and conditions observed in the field.
- Screened soil from each boring with a photo-ionization detector (PID) and collected two soil samples from each boring for laboratory analysis of volatile organic compounds (VOCs). Samples were collected based on PID readings and field observations. Soil samples were submitted to Pace Analytical, a state-certified laboratory for analysis. The laboratory analytical report is included in **Attachment A**.

- Prepared a boring log for each boring. Soil was logged consistent with the Unified Soil Classification System (USCS). Boring logs are included in **Attachment B**.
- Abandoned borings consistent with Wisconsin Administrative Code, Chapter NR 141. A borehole abandonment form was prepared for each boring. Abandonment forms are included in **Attachment B**.

## Soil Analytical Results

Soil analytical results are summarized in **Table 1**. Two soil samples from each boring were analyzed for VOCs. No CVOCs were detected in soil samples from boring GP1 (located in front of the Cash Store at 1111 N. Sherman Avenue), boring GP6 (located adjacent to Pollock Auto Body at 1714 Roth Street), and the boring for MW6R (located near the sidewalk along Roth Street).

Tetrachloroethene (PCE) was detected at concentrations exceeding the NR 720 groundwater RCL in the shallower (2 or 3.5 foot depth) sample at GP4, GP5, GP7, GP8, and GP9. PCE was not detected in the deeper sample collected at depths ranging from 4 to 9 feet bgs at these locations.

At boring GP2, PCE and trichloroethene (TCE) were detected in the shallow soil sample (2 foot depth), and PCE was detected at a much lower concentration in the soil sample collected at 4 feet bgs at this location.

At boring GP3, PCE was detected in the deeper soil sample at 7 feet bgs but not in the soil sample collected at 2 feet bgs.

In summary, PCE at concentrations exceeding the groundwater pathway RCL is present primarily in shallow soil (less than 4 foot depth) along the back (south side) of the Martial Arts, Dream Bikes, Boomerangs, and CSN units (**Figure 1**).

The PCE concentrations are lower than were found at the front (north) side of the former dry cleaners (samples from GB100-104, and HA100, 101; **Table 1**) in the vicinity of the drain line coming out of the front of the former dry cleaners. The drain line was investigated in 2015 as a potential source of the CVOCs in the parking lot area. The findings of the 2019 soil boring investigation support the idea that the main source of contamination likely was near the front of the former dry cleaners.

## Floor Drain

A floor drain inside the front of the former dry cleaner building had previously been referenced in project files and correspondence as a potential source of contamination, and was referenced in the Wisconsin Department of Natural Resources (WDNR) letter dated July 30, 2018.

SCS investigated the area of the reported floor drain on several site visits in Fall 2019 and Spring 2020. SCS also met with the property owner and tenant to inspect the area of the reported floor drain and evaluate the potential for soil sampling work. No indication of a floor drain was found in the front of the former dry cleaners as previously referenced in project files/correspondence. The concrete floor at Dream Bikes was refinished as part of the general refurbishing of the unit in 2015, and it appears the drain is patched over or otherwise no longer in existence.

However, based on the soil data near the drain line on the outside the former dry cleaners, the drain line on the outside of the building appears to have been a source of contamination.

## Monitoring Well Repair and Abandonment

**MW-1** - Monitoring well MW-1 could not be sampled due to a damaged protective casing. On July 17, 2019, SCS removed the damaged casing and replaced it with a new one, and sampled the well.

**MW-5** - Monitoring well MW-5 was obstructed and planned to be replaced; however, SCS was able to remove the obstruction and sampled the well on July 18, 2019. MW6R was installed instead of replacing MW-5 with approval of the WDNR project manager.

**MW-6/6R** - On August 7, 2019, SCS installed well MW-6R. The well boring was blind drilled to a depth of 20 feet bgs, and the well was constructed with 10 feet of PVC screen, locking well cap, and flush-mount protective casing. The work was performed consistent with Wisconsin Administrative Code, Chapter NR 141 requirements. The boring log, and well construction and development form are included in **Attachment B**. The well was developed and sampled in the following monitoring round. (MW-6 had last been sampled in 2010 and could not be found for any of the following sampling events; however in January 2020, MW-6 was found and sampled.)

**MW-12** - Monitoring well MW-12 was permanently damaged due to construction work. SCS located the well and permanently abandoned it on August 29, 2018. The WDNR was informed of the well abandonment previously but the well abandonment form was not submitted at that time. The abandonment form for MW-12 is included in **Attachment B**.

## Groundwater Monitoring

On July 17-18, 2019, and on January 7-8, 2020, SCS performed groundwater monitoring to evaluate current groundwater quality and flow conditions at the site. SCS measured groundwater levels and collected groundwater samples for laboratory analysis of VOCs from the following wells:

MW-1, PZ-1	MW-4, PZ-4	MW-6R	PZ-9, PZ-9A
MW-2, PZ-2	MW-5, PZ-5	MW-7, PZ-7	MW-11, PZ-11
MW-3, PZ-3	MW-6	MW-8R	MW-13

Monitoring well purge water was transported to the Madison Metropolitan Sewerage District (MMSD) for disposal with prior approval.

## Groundwater Flow

Groundwater level measurements and elevations are summarized on **Table 2**.

The groundwater levels measured in July 2019 and January 2020 are consistent with water levels measured previously at the site. The horizontal gradients are very low. The July data indicated components of groundwater flow to the northwest with a groundwater divide at the northeast corner of the parking lot and a component of flow to the southeast. This flow pattern is also indicated by the water levels measured in water table wells in April 2016 and December 2017. The January data indicated a very low gradient with flow to the south/southeast. This flow pattern is also indicated by the water levels measured in water table wells in November 2010. (Contour maps of groundwater

elevations for these three dates were included in the Groundwater Monitoring Report submitted to the WDNR and dated April 9, 2018.)

The very low gradients of groundwater flow at the water table make it difficult to assess the predominant direction of groundwater flow, but it appears that there is a component of groundwater flow to the northwest and also a component of flow to the southeast.

## Groundwater Quality

The analytical results are summarized on **Table 3**. The laboratory analytical reports are included in **Attachment C**. Well locations are shown on **Figure 1**.

Groundwater analytical data indicate consistent decreases in PCE concentrations within the groundwater plume along with degradation of PCE into cis-1,2-dichloroethene (cis-1,2-DCE), TCE, and vinyl chloride daughter products. Overall VOC concentrations have decreased due to biodegradation influenced by the whey injections which began in December 2009. Many wells showed significant increases in concentrations in 2011- 2013. The second and last full round of whey injections was completed in April 2015. Generally since 2015 concentrations have been fairly stable or decreasing. Following are comments regarding data from individual wells:

**MW-1** – PCE concentrations have been stable since 2015. Cis-1,2-DCE concentrations have been low and somewhat variable.

**PZ-1** – Concentrations have been low and currently there are only NR 140 preventive action limit (PAL) exceedances for PCE and vinyl chloride.

**MW-2** - PCE concentrations have been stable since 2015. Cis-1,2-DCE, TCE and vinyl chloride indicate degradation is occurring.

**PZ-2** - Cis-1,2-DCE and vinyl chloride concentrations have been fairly stable since 2015, but TCE and vinyl chloride have increased since 2013. PCE concentrations have been somewhat variable with recent increases.

**MW-3** – PCE concentrations are stable since 2015, and show significant decreases from 2008. TCE concentrations have increased since 2015.

**PZ-3** – Concentrations have been variable since 2015, with PCE and TCE increasing somewhat and vinyl chloride decreasing since 2016.

**MW-4** – Overall significant decreases in PCE, TCE, cis-1,2-DCE and vinyl chloride since 2008, with somewhat increased concentration of vinyl chloride since 2017.

**PZ-4** – Generally stable concentrations since 2008, but TCE and vinyl chloride increasing since 2016.

**MW-5 & PZ-5** – Some decreased concentrations at MW-5 and generally stable concentrations at both wells since 2015.

**MW-6 and MW-6R** – PCE and TCE increased from 2008 to 2020; vinyl chloride detected at MW6R in 2020. No data collected 2011 to 2019 from this location.

**MW-7 and PZ-7** – Generally stable or decreasing concentrations since 2015.

**MW-8/8R** – PCE fairly stable since 2015, except for some increase in 2020.

**PZ-9 and PZ-9A** – PCE stable or decreasing since 2013 or 2015.

**MW-11 and PZ-11** – PCE stable or decreasing somewhat since 2015; TCE decreased since 2015.

**MW-13** - PCE and TCE increasing somewhat since 2015.

## SUMMARY AND CONCLUSIONS

### Soils

PCE at concentrations exceeding the groundwater pathway RCL are present primarily in shallow soil (less than 4 foot depth) along the back (south side) of the Martial Arts, Dream Bikes, Boomerangs, and CSN units. The PCE concentrations are lower than were found at the front (north) side of the former dry cleaners in the vicinity of the drain line coming out of the front of former dry cleaners. There is no evidence of a floor drain remaining inside the front of the former dry cleaners. The findings of the 2019 soil boring investigation support the idea that likely the main source of contamination was near the front of the former dry cleaners (currently Dream Bikes).

### Groundwater

Groundwater analytical data indicate consistent decreases in PCE concentrations in the groundwater plume, along with degradation of PCE into cis-1,2-DCE, TCE, and vinyl chloride daughter products. Overall VOC concentrations appear to have decreased due to biodegradation influenced by the whey injections which began in December 2009. Many wells showed significant increases in VOC concentrations in 2011 to 2013; however the second and last full round of whey injection was completed in April 2015, and generally since 2015 concentrations have been stable or decreasing.

### Vapor Investigation and Vapor Mitigation On-Going Work

Results of the sub-slab vapor and air investigations conducted in 2019 and 2020 are summarized in a separate letter report. A vapor mitigation system was installed in the former dry cleaner (Dream Bikes) in March 2020. Documentation of the construction and testing of the mitigation system are also provided in a separate letter report.

On-going activities are focusing on evaluation of the vapor investigation data and mitigation options.

Please contact Betty at 608.216.7331 or [bsocha@scsengineers.com](mailto:bsocha@scsengineers.com) if you have comments or questions regarding this report.

VC = Vinyl Chloride

ND = Not Detected

MTBE = Methyl-tert-butyl ether

DCE = Dichloroethene

NE = Not Established

PCE = Tetrachloroethene

VOCs = Volatile Organic Compounds

FID = Flame Ionization Detector

TCE = Trichloroethene

-- = Not Applicable

ppm = FID measured in ppm as isobutylene

Notes:

**Bold+underlined** values exceed an NR 720 RCL, as of December 2018.

\* **Soil sample collected from under the former dry cleaners (currently Dream Bikes)through basement wall.**

Laboratory Notes/Qualifiers:

C9 = Calibration Verification recovery was outside the method control limits for this analyte. The laboratory control sample (LCS) for this analyte met CCV acceptance criteria, and was used to validate the batch.

J = Estimated concentration at or above the limit of detection and below the limit of quantitation.

(1) Dichlorodifluoromethane and 1,1,1-trichloroethane analysis - Calibration Verification recovery was above the method control limit for this analyte. Analyte not detected, data not impacted.

(2) Chloroethane analysis - Calibration Verification recovery was outside the method control limits for this analyte. The LCS for this analyte met CCV acceptance criteria, and was used to validate the batch.

(3) Hexachlorobutadiene analysis - Calibration Verification recovery was above the method control limit for this analyte. Analyte not detected, data not impacted.

Surr: 4-Bromofluorobenzene analysis - Calibration Verification recovery was below the method control limit for this analyte.

(4) Hexachlorobutadiene analysis - Calibration Verification recovery was above the method control limit for this analyte. Analyte not detected, data not impacted.

(5) Non-detect results are reported on a wet weight basis.

Abbreviations:

NI = Not Installed

NR = Depth to water not measured.

Notes:

1. Monitoring wells and the staff gauge were surveyed to feet above mean sea level using the previous Ayres Associates elevations.
2. MW5 and PZ5 PVC casings were cut off 0.20 feet prior to groundwater level measurements on January 8, 2020; PZ3 PVC casing was cut off 0.022 feet prior to groundwater level measurement on January 7, 2020. Revised elevations are shown in bold.
3. MW6R was installed on August 7, 2019; Missing well MW6R was found on January 7, 2020.

Revised By: BJS 1/08/2020

Abbreviations:

NE = No Standard Established

MTBE = Methyl-tert-butyl ether

ND = Not Detected

TCE = trichloroethene

-- = Not Applicable

PCE = tetrachloroethene

VOCs = Volatile Organic Compounds

TMBs = 1,2,4- and 1,3,5-trimethylbenzenes

µg/L = micrograms per liter or parts per billion (ppb)

Notes:

NR 140 ES - Wisconsin Administrative Code (WAC), Chapter NR 140.10 Table 1 - Public Health Groundwater Quality Standards.

NR 140 PAL - WAC, Chapter NR 140.10 Table 1 - Public Health Groundwater Quality Standards.

**Bold+underlined** values meet or exceed NR 140 enforcement standards.

*Italic+underlined* values meet or exceed NR 140 preventive action limits.

\*\* = Well MW-6 was reported as abandoned in 2010, but the well was buried. Well was found in 2020 and data was collected.

Laboratory Notes:

\* = Indicates value is between the limit of detection and the limit of the quantitation.

DUP = Result of duplicate analysis in this quality assurance batch exceeds the limits for precision.

J = Estimated concentration below laboratory quantitation level.

J1 = Estimated concentration at or above the Limit of Detection (LOD) and below the Limit of Quantitation (LOQ).

Q = Laboratory control sample outside acceptance limits.

S1H = First sample matrix spike recovery was high.

S2H = Second sample matrix spike recovery was high.

S2L = Second sample matrix spike recovery was low.

(1) Chloromethane - Check standard for this analyte exhibited a low bias. Sample results may also be biased low.

(2) 1,2,4-Trichlorobenzene - Check standard for this analyte exhibited a low bias. Sample results may also be biased low. Chloromethane - Check standard for this analyte exhibited a high bias. Sample results may also be biased high.

(3) Naphthalene - Result of duplicate analysis in this quality assurance batch exceeds the limits for precision.

(4) 1,1,1-Trichloroethane, Dichlorodifluoromethane - Check standard for this analyte exhibited a high bias. Sample results may also be biased high.

(5) 1,1-Dichloroethylene, 2,2-Dichloropropane, Methylene Chloride - Result of duplicate analysis in this quality assurance batch exceeds the limits for precision. 4-Isopropyltoluene - First sample matrix spike recovery was high.

(6) Methylene Chloride - Check standard for this analyte exhibited a high bias. Sample results may also be biased high.

(7) 1,2-Dibromo-3-chloropropane, Bromoform - Specified calibration criteria was not met.

(8) Surrogate = Post-analysis pH measurement indicates insufficient VOA sample preservation.

(9) Methyl-tert-butyl ether, Methylene Chloride, Vinyl Chloride, trans-1,2-Dichloroethene, 1,1-Dichloroethene, and Chloroethane = Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery. 1,1-Dichloroethane = Analyte recovery in the laboratory control sample exceeded QC limits. Analyte presence below reporting limits in associated sample. Results unaffected by high bias. Matrix Spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.

(10) 1,1-Dichloroethane = Analyte recovery in the laboratory control sample exceeded QC limits. Analyte presence below reporting limits in associated sample. Results unaffected by high bias.

(11) 1,1-Dichloroethane = Analyte recovery in the laboratory control sample exceeded QC limits. Analyte presence below reporting limits in associated sample. Results unaffected by high bias.

Surrogates - 4-Bromofluorobenzene (S) = Post-analysis pH measurements indicates insufficient VOA sample preservation

(12) Styrene = Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.

(13) 4-Bromofluorobenzene (S) = Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter).

(14) Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

RE: Project: 25211374.51 LAUNDRY LAND  
Pace Project No.: 40192643

Dear Betty Socha:

Enclosed are the analytical results for sample(s) received by the laboratory on August 08, 2019. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Dan Milewsky

## ANALYTICAL RESULTS

Project: 25211374.51 LAUNDRY LAND

Pace Project No.: 40192643

Sample: GP6 (3.5') Lab ID: 40192643003 Collected: 08/07/19 08:30 Received: 08/08/19 09:00 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,  
without the written consent of Pace Analytical Services, LLC.

## ANALYTICAL RESULTS

Project: 25211374.51 LAUNDRY LAND

Pace Project No.: 40192643

Sample: GP5 (6') Lab ID: 40192643006 Collected: 08/07/19 08:50 Received: 08/08/19 09:00 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

without the written consent of Pace Analytical Services, LLC.

## ANALYTICAL RESULTS

Project: 25211374.51 LAUNDRY LAND

Pace Project No.: 40192643

Sample: GP4 (3.5') Lab ID: 40192643007 Collected: 08/07/19 09:00 Received: 08/08/19 09:00 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## ANALYTICAL RESULTS

Project: 25211374.51 LAUNDRY LAND

Pace Project No.: 40192643

Sample: MW6R (5.5') Lab ID: 40192643019 Collected: 08/07/19 10:25 Received: 08/08/19 09:00 Matrix: Solid

*Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.*

## QUALIFIERS

Project: 25211374.51 LAUNDRY LAND  
Pace Project No.: 40192643

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

### LABORATORIES

PASI-G Pace Analytical Services - Green Bay

### ANALYTE QUALIFIERS

W Non-detect results are reported on a wet weight basis.

RE: Project: 25211374.51 LAUNDRY LAND  
Pace Project No.: 40201730

Dear Betty Socha:

Enclosed are the analytical results for sample(s) received by the laboratory on January 09, 2020. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Dan Milewsky

## QUALIFIERS

Project: 25211374.51 LAUNDRY LAND  
Pace Project No.: 40201730

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

### LABORATORIES

PASI-G Pace Analytical Services - Green Bay

RE: Project: 25211374.51 NORTH GATE  
Pace Project No.: 40191702

Dear Betty Socha:

Enclosed are the analytical results for sample(s) received by the laboratory on July 23, 2019. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Dan Milewsky

## REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,  
without the written consent of Pace Analytical Services, LLC.

## QUALIFIERS

Project: 25211374.51 NORTH GATE  
Pace Project No.: 40191702

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

### LABORATORIES

PASI-G Pace Analytical Services - Green Bay

### ANALYTE QUALIFIERS

HS Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter).

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

pH Post-analysis pH measurement indicates insufficient VOA sample preservation.

# Sample Preservation Receipt Form

Client Name: 3CS

Project # U0191702

All containers needing preservation have been checked and noted below:  Yes  No  N/A

Lab Std #ID of preservation (if pH adjusted):

Initial when completed:

Date/  
Time:

Pace Analytical Services, LLC  
1241 Bellevue Street, Suite 9  
Green Bay, WI 54302

Page 56 of 57

Pace Lab #	Glass		Plastic		Vials		Jars		General		VOA Vials (>6mm) *	H2SO4 pH ≤2	NaOH+Zn Act pH ≥12	NaOH pH ≥12	HNO3 pH ≤2	pH after adjusted	Volume (mL)
