Subject: RE: Northgate Vapor and Air Sampling Results, Madison, WI

Hi Cindy,
The e-mail went to everyone in the mall, below is a list of businesses and my contact for each.

Dream Bikes: Matt Martinez,
Boomerangs: Lori Treibel, Bev Krizan
CSN: Dove Burghardt & Nate Stoudt
Weaver Auto: Leon Ganser
V Nails: Peter
Door Creek Church: David Smith
Anytime Fitness: Kyle Woulf
Madison Oriental Market: Kyle Lee, Cynthia Lee
Dog Dog Daycare: Tracey Hasz
Naly's Floral: Naly Jasengnou
H&R Block: Cushman & Wakefield Management
Falbos Pizza: Keith Maggot
UPS Store: Margo Dixon
VA: Jason Thilges
Noah's Ark Pet Center: Joe Lloyd
Kaylee's Garden Barb LaBarge
ARTS for All Wisconsin: Christina Martin-Wright

Sincerely,

Alexander Company

Alexander Company would like to thank everyone for their cooperation with the recent rounds of testing. SCS Engineers has shared the results received to date in the attached report. Similar to previous reports it is our duty to inform you of all test results. If you have any questions after your review of the attached, you can contact Cynthia Koepke, a hydrogeologist with the Wisconsin Department of Natural Resources. Cindy is the project manager for the DNR and is working closely with SCS Engineers and their continued remediation work. Cindy is copied to this message and her information is below. As always you can also contact Nic Alexander (cc'd to this message) or myself with questions regarding the property.

Rebecca,
Attached is a letter report with the results of the sub-slab vapor testing that was done at Northgate in November 2020. Please let us know if any questions.
Thank you,
Betty

Subject: November 2020 Sub-slab Vapor Testing Results
Northgate Shopping Center, Madison, Wisconsin

Dear Rebecca:

SCS Engineers (SCS), on behalf of Northgate Partnership, recently conducted vapor testing at the Northgate Shopping Center. Samples were collected on November 16 & 17, 2020, at the following locations:

- 1159 N. Sherman — Weaver Auto Parts
- 1171 N. Sherman — V Nails & Spa Pedicure
- 1181 N. Sherman — Door Creek Church
- 1191 N. Sherman — CSN
- 1193 N. Sherman — Anytime Fitness
- 1197 N. Sherman — Madison Oriental Market
- 1201 N. Sherman — Dog Dog Daycare

The sampling locations are shown on the attached figure, and the sampling results are summarized in the attached table. The lab report is also attached.

Low concentrations of two chemicals (tetrachloroethene and trichloroethene) were detected in the samples. All the concentrations are less than the applicable Wisconsin Department of Natural Resources (WDNR) vapor risk screening levels.

The purpose of the vapor testing was to obtain information needed to design vapor mitigation systems for areas of the shopping center. Some of the retail spaces sampled in this event were previously tested and none were identified as having vapors in the subsurface that are greater than the applicable WDNR screening levels. The recent results are consistent with previous results.

The WDNR requires that property owners and tenants are notified of the results. We understand that Alexander Company will notify their tenants of the results. The attached WDNR fact sheet explaining vapor intrusion may be helpful when notifying tenants. The WDNR has requested that you copy the WDNR on the notification to your tenants. The WDNR project manager's contact information is listed on the next page.

Thank you for your cooperation.

Please feel free to contact Betty at 608.212.6664 or bsocha@scsengineers.com if you have any questions.

Sincerely,

Betty J. Socha, PhD, PG

Vapor Risk Screening Level (Small Commercial Buildings)					NE	NE	900	53	370

Abbreviations:
ppbv = parts per billion by volume NE = No Established Standard DUP = Duplicate sample

Notes:
1. Samples were collected in 6L summa canisters over 30 minute period and analyzed using the US EPA TO-15 analytical method.
2. Vapor Risk Screening Levels are from Wisconsin Department of Natural Resources' WI Vapor Quick Look-Up Table, which is based on November 2017 USEPA Regional Screening Level Tables.
3. **Bold** & **underlined** values meet or exceed Vapor Risk Screening Levels for small commercial buildings.

Laboratory Notes:
J = Estimated concentration at or above the Limit of Detection (LOD) and below the Limit of Quantitation (LOQ).
(5) These results have been converted to the units shown from the original units of measurement assuming 20 degrees Celsius and 1 atmosphere pressure. Values were not rounded according to EPA rounding rules. THC is quantitated based on the average response factors of several compounds; the nominal molecular weight of THC used for units conversion is the average of the molecular weights of the compounds used for quantitation.

RE: Project: 25211374.53 Laundry Land-Revised Report
Pace Project No.: 10539883

Dear Rob Langdon:

Enclosed are the analytical results for sample(s) received by the laboratory on November 19, 2020. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Minneapolis

This report was revised December 14, 2020, to change the sample IDs for 10539883013 and 10539883014.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Kirsten Hogberg

REPORT OF LABORATORY ANALYSIS

Pace Analytical Services, LLC
1700 Elm Street - Suite 200
Minneapolis, MN 55414
(612)607-1700

QUALIFIERS

Project: 25211374.53 Laundry Land-Revised Report
Pace Project No.: 10539883

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

Wisconsin DNR vapor intrusion quick facts

What is Vapor Intrusion?

Chemicals used in commercial or industrial activities – dry cleaning chemicals, chemical degreasers and petroleum products such as gasoline – are sometimes spilled and leak into nearby soil or groundwater. When this happens, these chemicals may release gases or vapors, which travel from the contaminated groundwater or soil and move into nearby homes or businesses. This is called vapor intrusion.

The process when chemical vapors from contaminated soil or groundwater enter a home or other structure is called vapor intrusion.

Why are these chemical vapors a problem?

The chemicals that cause vapor intrusion are known as volatile organic compounds, or VOCs. Even when spilled into soil or water, these chemicals easily evaporate. They don't cause human health problems when they evaporate into the outside air, but when their vapors move into homes or businesses, they may cause long-term health problems for the people who live or work in those buildings. These vapors are usually odorless and colorless and undetectable without special testing equipment.

Why is vapor intrusion a concern?

Exposure to some chemical gases or vapors can cause an increased risk of adverse health effects. Whether or not a person experiences any health effects depends on several factors, including the amount and length of exposure, the toxicity of the chemical, and the individual's sensitivity to the chemical. When harmful chemical vapor intrusion is the result of environmental contamination, the Wisconsin Department of Natural Resources (DNR) requires that steps be taken to reduce or eliminate exposures which could be harmful to human health.

What should I expect if vapor intrusion is suspected near my home or business?

For businesses or other locations where VOC contamination has been found, the DNR requires that the potential for vapor intrusion be investigated. If you live near a site being cleaned up, you may be contacted by the site owner or others working on the cleanup. Your cooperation and consent will be requested before any testing or sampling is conducted on your property. Ask the person contacting you any questions you have about the work being done, or contact the DNR for more information (see DNR contact information on reverse). For more information about testing for vapor intrusion, see DNR-Pub-RR-954, "What to Expect During Vapor Intrusion Sampling."

How Vapors Enter a Building

If you live near a commercial or industrial facility or landfill where VOCs have entered either the soil or groundwater, there may be a potential for those chemicals to travel as vapors into your home or business. Vapors can enter buildings in various ways, including through cracks in the foundation and openings for utility lines. Building ventilation and weather can influence the extent of vapor intrusion.

Where can I find more information?

Health and vapor-related information can be found at the Wisconsin Department of Health Services (DHS) website at **dhs.wisconsin.gov** , search "Vapor." For other health-related questions, please contact your local health department: **www.dhs.wisconsin.gov/localhealth**.

For more DNR information, please visit the DNR's Remediation and Redevelopment (RR) Program's Vapor Intrusion page at **dnr.wi.gov/topic/Brownfields/Vapor.html**.

Additional information can be obtained through the DNR field office in your region. To find the correct office, visit the RR Program Staff Contacts page at **dnr.wi.gov/topic/Brownfields/Contact.html** or call the RR Program at (608) 266-2111.
