Subject: RE: Martinos Master Dry Cleaning (02-30-552188) - February 2022 Vapor Sampling at DeBartolo Property

Hi Brian,

Thank you for your response. Considering the fact that the contaminants of concern for this site investigation are chlorinated VOCs, the DNR recommends that the next round of sampling at the DeBartolo property include paired indoor air and sub-slab vapor samples.

Best,

Jane

Jane,

Given the non-detect results, we will plan another round to confirm but limit it to sub-slab vapor samples only – no air samples.

Subject: Martinos Master Dry Cleaning (02-30-552188) - February 2022 Vapor Sampling at DeBartolo Property

Hi Brian,

Yesterday the DNR received the above-referenced sampling report. I wanted to check-in to see whether another round of vapor sampling is being planned to confirm the subslab and indoor air sampling results for the DeBartolo property?

Thanks,

Jane
