Subject: Case Status

Mr. Dulmes called Rick Joslin (DNR) to discuss case status. The case has not moved for quite some time. Mr. Dulmes is working with a company "Policy Find" and think that there might some insurance coverage for the investigation and remediation of the site. Joslin asked that Mr. Dulmes meet with his consultant and come up with a plan soon to continue with the site investigation activities even if that needs to occur before the results of Policy Find. Joslin explained that DERF is proposed to sunset by 2030 and although that seems like a lot of time, the time it takes for a claim reimbursement (i.e. 4 to 5 years) that really does give him a lot of time to investigate and remediate the site. Mr. Dulmes stated that if there is an insurance policy, he would not need DERF. Joslin explained that the site investigation needs to continue whether or not there is an insurance policy or not. Joslin also explained that Mr. Dulmes could expect a letter from the department in the near future. Joslin said that he would appreciate updates with regard to the status of this case as appropriate and that he would be checking in on the progress in a few weeks.

Notes prepared by Rick Joslin, WDNR
