Subject: 11/1/22 Discussion summary for additional vapor sampling - Dry Cleaners Etc
02-69-552218

Hello All,

Thank you for the discussion earlier regarding next steps for the off-site vapor investigation for Dry Cleaners Etc. To recap the discussion, the following residences have been investigated thus far:

- 108 E Cook
- 113 E Beacon
- 117 E Beacon

512 Lawrence and 113 E Cook have recently provided access to the US EPA, and Andy will plan to sample indoor air within these residences in either early December or January of next year. A week or more prior to this sampling event, DHS will plan to send out a flyer to the remaining residences that have not granted access (i.e. 114 E Cook, 118 E Cook, 111 E Beacon, 121 E Beacon, and 120 E Beacon) to let them know the date of sampling, provide literature, and request that they allow access. An attempt will also be made to contact the new homeowner at the recently sampled 117 E Beacon to perform a second round of sampling.

US EPA may also perform a longer duration passive sampling event at the library located at 412 S Pearl.

Please let me know if you have any edits or additional comments.

Thanks,
Josie
