=====
Ebbott returned DuFresne's call:

DuFresne would like to see a round of geo samples collected from the existing wells to evaluate current conditions prior to the new well / boring installation. Upon obtaining new data evaluate whether or not the approved work scope is still appropriate. Proposed sampling event is already approved per the SI change order #1.

Ebbott will talk with the RP to see if he supports collecting a round of groundwater samples. Ebbott will get back to DNR with a response.
