Subject: Re: Mosinee Dry Cleaners 02-37-552230

Hi Matt, we just did the groundwater sample event and additional sub-slab sample. Both results look great! I looked at that approved scope recently, and thought we proposed the CDR after a year of operation, additional soil sample through the floor, and post operation sub slab vapor. I'll take another look at that document on Monday, and if I misread it, I can do a CDR now.

Thank you,
Andrew Delforge, P.G.

Andy- just touching base on the construction documentation report for the SVE system installed last summer at the Mosinee Dry Cleaner site. When do you think the report will be submitted? Thanks much,

We are committed to service excellence.
