Subject: PFAS sampling review and VI progress - Blackhawk Cleaners, BRRTS # 02-12-552357

Rob,

After discussing the PFAS sample results with review committee, they determined additional sampling is needed to establish a stable or decreasing trend in the impacted wells. Please sample all wells near or above 20ppt concentration of combined PFOS + PFAS (same set as the last round).

I attempted to contact the resident of 119 S. Dousman St by phone, but was not able to speak with them directly. I mailed out the 3rd letter request today to both 119 and 123 S Dousman. I contacted the health department, who will be reaching out to them as well.

-Matt
