

APPENDIX N

2012 and 2013 Remedial Activities Documentation

**N1: MMSD Wastewater Discharge Permit
& Treated Stormwater Discharge Summary**

May 1, 2013

Mr. Mike Kellogg
Connell Aluminum Properties LLC
One International Place
Boston, MA 02110

Subject: Notice of Intent to Discharge Wastewater 13.009

Dear Mr. Kellogg:

The Milwaukee Metropolitan Sewerage District (MMSD or District) received your Notice of Intent (NOI) for the discharge of stormwater from your facility at 9100 South 5th Avenue, Oak Creek, Wisconsin. A leaking roof has allowed approximately 200,000 gallons of stormwater to accumulate inside the building.

The proposed discharge is approved, according to the following conditions:

- (1) All wastewater discharged must comply with the prohibitions and limits established by secs. 11.202 and 11.203, MMSD Rules, which are enclosed. In addition, the total concentration of volatile and semi-volatile organic compounds may not exceed 5 mg/L at any time and the concentration of total suspended solids may not exceed 100 mg/L at any time.
- (2) You must use the bag filter and carbon vessel described in the NOI. The rate of discharge must be slow enough to ensure effective treatment. You must sample treated wastewater for PCBs. Discharges may commence only after results are obtained showing compliance. You must provide these results to the District before the commencement of discharge.
- (3) **Discharge is prohibited during rain** and within 24 hours after the site receives one-half inch or more of rain.
- (4) You must determine the total volume discharged. For this purpose, you may use either a totalizing meter or calculations using pump capacity and operating time. You must report the total volume discharged within 5 days after the conclusion of discharges.
- (5) The District must receive \$250 for reviewing the NOI, according to the District's *Cost Recovery Procedures Manual*, page 11-2. In addition, if the total volume discharged exceeds 50,000 gallons, then the District must receive sewer user charges at a rate

Page 2

of \$2.50 per thousand gallons, according to the *Cost Recovery Procedures Manual*, page 11-5. The District will issue a bill after receiving the report required by Condition (4) above.

- (6) At any time when wastewater treatment or discharge is occurring, the District must have access to the site for inspection or sampling.
- (7) Mr. David Wozniak of the District's sampling staff must receive notice of the commencement of discharge. Contact Mr. Wozniak at 414-325-5136 or dwozniak@mmsd.com.

If you have questions, please contact Harvey Matyas at 414-225-2164 or hmatyas@mmsd.com. Thank you for your cooperation.

Sincerely,

Peter R. Topczewski
Director of Water Quality Protection

Enclosure

c: Oak Creek

Subchapter II – Discharge Regulations

11.201 General Prohibitions

(1) Compliance with Rules

Users may not discharge to the sewerage system except in compliance with this chapter.

(2) Interference

Users may not discharge any pollutant to the sewerage system in a quantity or concentration that, alone or in conjunction with other discharges:

- (a) inhibits or disrupts the sewerage system or its sludge processes; and
- (b)
 - 1. causes a violation of the District's WPDES permits or air pollution control permits;
 - 2. increases the magnitude or duration of a violation;
 - 3. prevents the use or disposal of sewage sludge in compliance with any applicable local, state or federal statutes, ordinances regulations, permits, or other requirements; or
 - 4. inhibits the marketing of treated sewage sludge.

(3) Pass Through

Users may not discharge to the sewerage system any pollutant in a quantity or concentration that, alone or in conjunction with other discharges, is a cause of a discharge from the sewerage system to waters of the state that violates the District's WPDES permits or increases the magnitude or duration of a violation.

11.202 Prohibited Discharges

Users may not discharge to the sewerage system:

- (1) pollutants that create a fire or explosion hazard in the sewerage system, including but not limited to pollutants that result in wastewater with a closed cup flashpoint of less than 140 F or 60C;
- (2) pollutants that will cause corrosive structural damage to the sewerage system, including but not limited to discharges with a pH lower than 5.0 s.u.;
- (3) solid or viscous pollutants that will obstruct the flow in the sewerage system;

- (4) heat in amounts that will cause interference by inhibiting the biological activity in the treatment plant, including but not limited to heat in an amount that causes the influent of the treatment plant to exceed 40 C (104 F);
- (5) used motor vehicle anti-freeze, motor oil, brake fluid, transmission fluid, hydraulic fluid, oil-based paint, and paint thinners if the material is in a collectable and recyclable quantity or if the discharge would result in a violation of the oil and grease limit set forth in sec. 11.203(1);
- (6) pollutants that result in the presence of toxic gases, vapors, or fumes within the sewerage system in a quantity that may cause acute worker health and safety problems;
- (7) hauled waste, except for hauled waste that:
 - (a) consists only of domestic wastewater, and
 - (b) is discharged at a point designated by the District;
- (8) any substance that will cause the sewerage system's treatment residues, sludge's, or scum's to be unsuitable for reclamation and reuse, that causes interference with the reclamation process, or that inhibits the marketing of treated sewage sludge;
- (9) any wastewater that contains radioactivity in amounts greater than a drinking water standard established by the U.S. Environmental Protection Agency or the Department;
- (10) at any site that is either served by a separate storm water conveyance system or riparian to waters of the state:
 - (a) storm water, surface water, or groundwater, except when a remedial action undertaken according to the requirements of the Department or the U.S. Environmental Protection Agency requires the removal of this type of water and a direct discharge to waters of the state would impose unreasonable costs or delays;
 - (b) roof runoff;
 - (c) subsurface drainage;
 - (d) single-pass cooling water, cooling tower blowdown, or reverse osmosis concentrate, except as provided in subpar 1 and 2:
 - 1. If a storm sewer is not available, then a user may discharge cooling tower blowdown and reverse osmosis concentrate from December 1 to March 31 and any other period when necessary to protect the public health, welfare, or safety.
 - 2. Users may discharge single-pass cooling water from small-scale bench-top condensers, except as provided in par. (e)(2).
 - (e) from sources constructed after May 1, 2005:

1. condensate from compressed air or process steam systems, and
2. single-pass cooling water from small-scale bench-top condensers; or

(f) any other wastewater for which the Department has issued a general WPDES permit;

(11) any non-domestic wastewater before the District has approved a *Notice of Intent* submitted according to sec. 11.401;

(12) any mass, concentration, or volume of a substance in excess of the amount allowed in the user's Wastewater Discharge Permit; and

(13) The following pollutants, except as provided in pars. (b), (c), and (d):

Acrolein	Furans
Alkylated lead	Heptachlor
Benzo(a)Pyrene	Hexachlorobenzene
Chlordane	Lindane (BHC)
Dieldrin	Mirex
Dioxins	Pentachlorobenzene
3,3'-Dichlorobenzidine	Polybrominated biphenyl ethers
4,4'-Dichlorodiphenyltrichloroethane (DDT)	Polychlorinated biphenyls (PCBs)
Endosulfan	1,2,4,5-Tetrachlorobenzene
Endrin	Toxaphene
Fluoranthene	2,4,6-Trichlorophenol

(b) amounts allowed by an applicable categorical pretreatment standard;

(c) amounts occurring in landfill leachate after implementation of the best available treatment technology economically achievable, according to a limit established in a wastewater discharge permit;

(d) amounts caused by sources beyond the reasonable control of the user, such as contamination in the water supply, air deposition, or raw materials

11.203 Local Limits

- (1) (a) Users may not discharge into the sewerage system any process wastewater containing concentrations of pollutants greater than the following limits, except as provided in sec. 11.213 and sec. 11.214(12):

Pollutant	Limit (mg/L)
Ammonia	224 ⁽¹⁾
Arsenic, total	0.6
Cadmium, total	1.5
Chromium, total	64
Copper, total	6.0
Lead, total	2.0
Mercury, total	0.0026
Molybdenum, total	12
Nickel, total	4.0
Silver, total	5.8
Zinc, total	8.0
Cyanide, total	2.9
Hexane extractable materials ⁽²⁾	300

(1) This limit applies only to discharges normally tributary to the South Shore Wastewater Treatment Facility.

(2) This limit applies to results obtained using Method 1664, as established by 40 CFR 136.

Land Disposal Restriction Notification Form

Generator Name **CONNELL ALUMINUM PROPERTIES**

EPA ID Number **WID045954641**

Manifest **000658842VES**

This notice is being provided in accordance with 40 CFR 268.7 to inform you that this shipment contains waste restricted from land disposal by the USEPA under the land disposal restriction program. Identified below for each container is the designation of the waste as a wastewater or non-wastewater, the Clean Water Act (CWA) permit status associated with the treatment/disposal facility, applicable waste codes and any corresponding subcategories, list of any F001-F005 solvent constituents that are present in the waste, and any underlying hazardous constituents (UHC) that are present.

Container Number:

-001 (1/ 1)

WIP / Approval Code:

339633 / CWDSGRHAZ

Form Designation / CWA Status:

Non-Wastewater / Non-CWA

Waste Codes (Subcategories):

D008 (NONE)

Constituents (F001 - F005):

None

UHCs Present:

None

Treatment Requirements:

Restricted waste requires treatment to applicable standards.

Additional Notices:

I hereby certify that all information in this and associated land disposal restriction documents is complete and accurate to the best of my knowledge and information.

Manifest **000658845VES**

This notice is being provided in accordance with 40 CFR 268.7 to inform you that this shipment contains waste restricted from land disposal by the USEPA under the land disposal restriction program. Identified below for each container is the designation of the waste as a wastewater or non-wastewater, the Clean Water Act (CWA) permit status associated with the treatment/disposal facility, applicable waste codes and any corresponding subcategories, list of any F001-F005 solvent constituents that are present in the waste, and any underlying hazardous constituents (UHC) that are present.

Container Number:

-001 (1/ 1)

WIP / Approval Code:

339633 / CWDSGRHAZ

Form Designation / CWA Status:

Non-Wastewater / Non-CWA

Waste Codes (Subcategories):

D008 (NONE)

Constituents (F001 - F005):

None

UHCs Present:

None

Treatment Requirements:

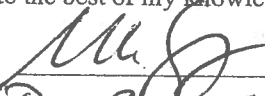

Restricted waste requires treatment to applicable standards.

Additional Notices:

I hereby certify that all information in this and associated land disposal restriction documents is complete and accurate to the best of my knowledge and information.

THIS MEMORANDUM

is an acknowledgement that a bill of lading has been issued and is not the Original Bill of Lading, not a copy or duplicate, covering the property named herein, and is intended solely for filing or record.

Shipper's No. _____

(Carrier) Fairway Transit SCAC _____

Carrier's No. _____

Received, subject to the classifications and tariffs in effect on the date of this Bill of Lading:

at _____, date 11 27 12 from _____

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said company (the word company being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its own road or its own water line, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the conditions not prohibited by law, whether printed or written, herein contained (as specified in Appendix B to Part 1035) which are hereby agreed to by the shipper and accepted for himself and his assigns

(Mail or street address of consignee for purposes of notification only)
