Subject: Wilson's Fish Market Closure Review - BRRTS 03-52-554656

Jason,

As discussed, during a telephone call shortly after the review, this site was presented to the closure committee on September 6th, 2018. Per our discussion, this site will be/has been paused while you prepare a PECFA cost estimate for groundwater monitoring well abandonment and for sub-slab vapor sample collection from one point beneath the onsite building. The vapor sample is to be analyzed for PVOCs plus naphthalene, utilizing method TO-15. Once the well abandonments are completed, the forms are submitted and sub-slab results are reported and incorporated within a revised closure report submittal, the final closure letter can be written, if the vapor assessment confirms that no vapor risk exists.

Thank you for your efforts to move this case to final closure,

Lee
