**Subject: Documentation of Solid Waste Disposal Location and Compliance with the Conditions of Approval for the Mankowski Soil Remediation and the Ready for Reuse Grant RRG-046 WDNR FID#230113730 BRRTS# 02-30-554934**

Dear Mr. Volkert,

The City of Kenosha (City) is currently engaged in conducting remediation at the Mankowski Property located at 2600 45<sup>th</sup> Street, Kenosha Wisconsin. AECOM, on behalf of the City, is submitting this letter requesting approval of the proposed disposal location for solid waste generated at the Mankowski Property in general conformance with the requirements of the Ready for Reuse Grant Agreement RRG-046 Section V Special Conditions, paragraph 9.

Samples for waste characterization were collected from representative planned remedial excavation locations and submitted for laboratory analysis. The results of the analyses were tabulated and bids were obtained from nearby landfills for disposal of the soil (and other debris) to be excavated and landfill as part of City-wide remediation projects. The selected licensed landfill is Kestrel Hawk, located in Racine, Wisconsin. Excavated contaminated soil will be sent to this landfill. The landfill will provide weight tickets for documentation of disposal. A summary of the weight tickets and quantity disposed by material type will be documented in a Remedial Action Documentation Report that will be prepared to document this work conducted using the Ready for Reuse loan funds.

The planned remedial excavation is expected to start late May with completion by the end of June 2017. We appreciate your review and the approval of the selected disposal location.

Yours sincerely,

AECOM Technical Services, Inc.
