Subject: **Change of Project Manager and Request for Site Update**
Marinette Marine - #10 BLDG Expansion
BRRTS Activity # 02-38-555082

Dear Mr. Hermansen:

Due to a recent change in staff, I will now be responsible for the direct oversight of the above-referenced environmental repair site. Effective immediately, all correspondence, reports, and submittals concerning the above site should be sent to the following address:

Wisconsin Department of Natural Resources
ATTN: Maizie Reif
Remediation and Redevelopment Program
2984 Shawano Avenue
Green Bay, WI 54313

On March 15, 2018, the Department discussed a pathway to closure with your consultant. To date, the Department has not received the closure request.

In addition, previous evaluations as part of the investigation at the site did not include scoping for emerging contaminants. On August 17, 2020, a letter was issued by the DNR to the property owner, reminding them that all sites need to include an evaluation of emerging contaminants per Wis. Admin. Code § NR 716.07. An evaluation of emerging contaminants consistent with Wis. Admin. Code § NR 716.07 for this site is required to be completed prior to closure.

In accordance with Wis. Admin. Code § NR 716.07, site investigation scoping shall include an evaluation of all potential contaminants associated with a hazardous substance discharge and/or environmental pollution, including emerging contaminants. Therefore, your email response for the evaluation should include any available information on whether any products containing emerging contaminants, including PFAS, are presently or were produced, used, handled, or stored at the site or used in any process services. If PFAS is documented, the duration of PFAS-containing product use; the type of PFAS contained in the product; and any areas of the site where PFAS-containing products may have been used, stored, managed, or discarded should be included in the evaluation. The evaluation must include an assessment of all environmental media affected or potentially affected by the contamination per Wis. Admin. Code § NR 716.07(4), and potential or known impacts to receptors per Wis. Admin. Code § NR 716.07(8).

The Department requests that you submit any more recent information and provide a plan to fulfill your responsibility to address the contamination on your property.

Your prompt attention to this request is appreciated.

If you have any questions, please contact me by telephone at 920-360-4291, or via email at maizie.reif@wisconsin.gov

Sincerely,

A handwritten signature in blue ink that reads "Maizie Reif". The signature is written in a cursive style with a large, stylized "R" and "i" in the last name.
