Manitowoc, WI 54220

SUBJECT: Request for Status Update on Jagemann Plating Co, Inc. Case
1324 South 26th St, Manitowoc, Wisconsin
WDNR BRRTS #: 02-36-555544

Dear Mr. Hacker:

I am writing to request an update on the status of the above referenced environmental repair (ERP) case. On July 10, 2014, the Wisconsin Department of Natural Resources (Department) received a Site Investigation Work Plan prepared by Robert E. Lee & Associates, Inc. (REL) and submitted to the Department on your behalf. Additional information for the work plan submitted by REL was received by the Department on October 15, 2014 and the Department approved the work plan on October 28, 2014. A status update submitted by REL was received by the Department on February 2, 2015 stating the site investigation per the approved work plan would begin in February 2015. Another status update submitted by REL was received by the Department on July 31, 2015 stating there has been no activity for the site investigation and options are being evaluated for vapor intrusion system installation. Since this time the Department has not received any information from you or your consultant regarding this case.

The Department would appreciate a case status update from you or your consultant within 14 days. A letter or report documenting the most recent site investigation/remediation activities taking place at the site is preferred, but a telephone call is also considered an appropriate response.

Your cooperation and timely response to this matter is appreciated. If you have any questions or comments, please feel free to contact me at (920) 662-5178 or at Tauren.Beggs@wisconsin.gov.

Sincerely,

Tauren R. Beggs
Hydrogeologist
Remediation & Redevelopment Program
