Hi Tauren –

Thank you very much. I appreciate it.

That issue of PFAs screening prior to remediation for VOCs is something that I have already discussed with Mike in the past. I will probably reach out to you next week to see if you have availability for a call with me, after I speak with Mike again. I appreciate your help.

Thank you - Nicole

Hi Nicole,

Since a remedial action is going to be proposed at this site, the required assessment for PFAS sampling is going to have to be proposed and occur soon for this site. I know the focus has been on VOCs and the vapor issues, but PFAS is also a requirement of the investigation that still needs to be conducted and may potentially impact certain things with a proposed remedial action. Therefore, just wanted to send a reminder about this.

Regards,
