Hi Tauren:

Sorry I am a bit late on that work scope. I have it nearly completed. I have to modify the original scope a bit after talking with Mike Jagemann. We went ahead and proceeded with some work plan items such as passive soil gas sampling and sub-slab sampling to better determine the extents of vapor impacts. We also performed a quarterly post-remedial groundwater monitoring event and have sampled six outlier wells for PFAS to see if the PFAS has potentially migrated off-site. I will be returning to the site next week to retrieve the passive samplers and measure explosive gases in select wells and sub-slab vapor ports. It will be a while before the soil gas and PFAS results come in, probably mid to late November.

In the meantime, I will complete the work scope and get that to you by the end of next week, November 3<sup>rd</sup>.

Good afternoon Wayne,

Checking in to see what the timing is on the updated work plan submittal. You had previously indicated that you were intending to submit it towards the end of September. Please provide an updated timeframe when the work plan will be submitted.

Thanks,

**We are committed to service excellence.**

Hi Wayne,

Thanks for the update, that sounds good on the work plan preparation and submittal.

Regards,  
Tauren

Hi Tauren: Just a heads up that I uploaded the results of our recent groundwater sampling event of July to the portal. As I have indicated in the memo, I apologize for missing some of the sampling criteria. As stated, I am working with Mike Jagemann to follow up on your past requests, determine next steps along with short and longer-term costs that he can expect. I am also planning to prepare more helpful figures for reporting. We will be preparing an updated work plan that we intend to submit to you towards the end of September.
