Hi Angie:

On March 5, 2018, we received email (see below) from PSI, that the missing information (Site Investigation Report per NR 716; Monitoring Well Figure(s) and associated attachments)) requested during our administrative review of the subject site closure request was being revised/reviewed for submittal to the DNR. We have not yet received the information required to complete our administrative review of the subject site.

Please note that we will proceed with administrative withdrawal of the closure request within the next 30 days (by July 18, 2018), unless we receive information to support the closure request. We would like to remind you that the missing/ requested Site Investigation Report being finalized (as indicated in the email below), shall comply with the criteria outlined in Wis. Admin. § NR 716.

Let me know if you have questions. Thanks.

Hi Eric,

I have made the revisions to the monitoring wells and the associated attachments. I'm finalizing the revisions on the Site Investigation Report prior to it going to the client for review and subsequently sending to you. We'll be looking at later in the week to get it to the client. Once their review is completed, all of the requested information potentially could be sent out the following week to you.

Thank you,

Pat
