Subject: Request for Additional Information - Case Closure Submittal, City of South Milwaukee Vacant Parcel, 222 N. Chicago Avenue, South Milwaukee, WI. BRRTS #: 02-41-556175 , FID #: 341189420

Hi Pat:

The Closure Committee (Committee) met yesterday (December 6, 2018), to discuss the subject site. At the end of the meeting, the Committee requested additional information. I called you today (December 7, 2018), to relate the information to you. I also promised to follow-up with email. Below is an outline of our discussion regarding the additional information requested:

1. A map showing all RCLs extent (one isocontour line that includes the entire site - since site-wide fill is also a source of impact). Revise the legend for metals - Background Threshold Values are not usually considered in determining RCLs extent. Please keep the iso-contour line to your property boundary.
2. A map showing residuals of all RCLs exceedances (the isocontour line would include the entire site - also due to presence of site-wide fill materials). Provide rationale for site-wide cap (i.e. site-wide fill).
3. Provide the information/data used to determine vapor screening criteria, including conclusions.
4. Provide a vapor map for the area (northeast of site and/or other areas) deemed for future potential vapor risk.
5. Revise the Continuing Obligations Table and check, "xiii": Vapor: Residual volatile contamination poses future risk of vapor intrusion.

Please let me know if you have questions. Thanks.

Eric
