SUBJECT: Final Case Closure  
Fort McCoy Bldg 2184, Fort McCoy, Sparta, WI  
WDNR BRRS Activity #: 02-42-557145  
FID #: 642024900

Dear Mr. Balliett:

The Department of Natural Resources (DNR) considers the Fort McCoy Bldg 2184 site closed. No further investigation or remediation is required at this time. Provide this letter to anyone who purchases this property from you.

This final closure decision is based on the correspondence and data provided, and is issued under ch. NR 726, Wisconsin Administrative Code. The West Central Region (WCR) Closure Committee reviewed the request for closure on October 3, 2013. The Closure Committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases.

This former hazardous waste management facility had soil contaminated with lead. The response included soil excavation. This closure pertains only to the lead release identified in the specific area of monitoring well McD-4 during Geohydrologic Study No. 38-26-3300-95 in June of 1995.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

The DNR appreciates your efforts to restore the environment at this site. If you have any questions regarding this closure decision or anything outlined in this letter, please feel free to contact me by phone at (715) 839-3748, or via email at [mae.willkom@wisconsin.gov](mailto:mae.willkom@wisconsin.gov).

Sincerely,

Mae Willkom  
Hydrogeologist  
Remediation & Redevelopment Program
