Subject: Tank System Site Assessment Report - Vogue Cleaners
1416 North 4th Street
Milwaukee, Wisconsin

Dear Mr. Rose:

Endpoint Solutions Corp. (Endpoint) was retained by Environmental Services Plus, Ltd. (ESP) of Kaukauna, Wisconsin to complete a Tank System Site Assessment (TSSA) in accordance with Wisconsin Administrative Code (WAC) Safety and Professional Services (SPS) Chapter SPS 310.580(3) requirements.

Project Background

The Department of Safety and Professional Services (DSPS) requested bids for the closure by removal of the underground storage tanks (USTs) located at Vogue Cleaners located at 1416 North 4th Street in Milwaukee, Wisconsin (the "Site"). According to the State of Wisconsin storage tank database, four (4) USTs and associated piping remained on Site. The database listed USTs consisted of two (2) 8,000-gallon capacity, one (1) 2,000-gallon capacity and one (1) 500 gallon capacity tanks. The 2,000 gallon and one (1) of the 8,000 gallon USTs are shown as containing product. The USTs were located on the southeastern side of the Site between the building and the paved alleyway; see **Figure 1** and **Figure 2**.

Site Assessment Activities

On June 18, 2012, Endpoint met ESP at the Site to observe and document closure by removal of the USTs. Mr. Kirk Kapfhammer, (WI UST Site Assessor # 41583) and Mr. Tim Petrick (WI UST Site Assessor #28917) were present during UST closure activities to document the closure and collect the necessary TSSA samples.

The USTs were located in the southeastern portion of the property, located between the building and the paved alley to the east and the building and the property line to the south. The actual USTs revealed consisted of two (2) approximate 600-gallon vertical USTs with cone bottoms, one (1) 8,000 gallon UST formerly containing Stoddard solvent and one (1) 8,000 gallon UST formerly containing fuel oil. Product was removed from both the fuel oil and Stoddard solvent UST prior to closure activities.

The two (2) vertical USTs were adjacent to the building wall with the remaining two (2) USTs located side by side in an east - west orientation, located approximately 20 feet south of the building wall. The native soils surrounding the UST cavities primarily consisted of fills and silty clay. The UST tank bed had been backfilled with native materials during installation, except for the 8,000-gallon UST tank bed which was backfilled with pea gravel. In addition to

Endpoint Solutions

the tanks themselves, it was noted the vent piping over the top of the USTs ran in a westerly direction to the building wall.

The first UST to be removed (T-1) was a vertical UST with noticeable pitting and holes, while the rest of the USTs (T-2, T-3, T-4) appeared to be in good condition with minimal pitting and no noticeable holes. Groundwater was observed at the bottom of the 8,000-gallon Stoddard solvent UST cavity.

Endpoint collected the necessary sidewall soil samples at different depths below the ground surface (bgs) based on individual USTs. The sample depths are recorded on **Table 1 - Soil Analytical Results Summary**. The base of the cavity soil samples were collected at approximately 14 feet bgs. All soil samples were submitted to Synergy Environmental Lab, Inc. (Synergy) of Appleton, Wisconsin under chain-of-custody procedures for laboratory analysis of diesel range organics (DRO) and volatile organic compounds (VOCs) as requested by Wisconsin Department of Natural Resources (WDNR) personnel, Theresa Evanson in an e-mail dated June 6, 2012.

All sample locations are shown on **Figure 2**, soil sample analytical results are summarized on **Table 1** and laboratory analytical reports are included in **Appendix A**.

Appendix B contains photographic documentation of the USTs.

Appendix C contains a copy of the Wisconsin Department of Commerce Form ERS-8951, TSSA.

Conclusions

Four (4) USTs were closed by removal on June 18th, 2012. TSSA soil sample analytical results associated with the former USTs indicated petroleum contamination above Wisconsin Administrative Code (WAC) Chapter NR 720 and 746 Cleanup Criteria.

Recommendations

Endpoint recommends that this complete report be submitted to the WDNR along with an appropriate release notification.

Closing

We trust the contents of this report are sufficient for your requirements. Should you have any questions or comments, please do not hesitate to contact us.

Sincerely,

Endpoint Solutions

"J" Flag: Analyte detected between LOD and LOQ

LOD Limit of Detection

LOQ Limit of Quantitation

Code **Comment**

- 1 Laboratory QC within limits.
- 4 The continuing calibration standard not within established limits.
- 8 Closing calibration standard not within established limits.
- 13 Sample does not meet method specific weight requirements.
- 54 Possible gasoline contamination indicated outside DRO window.

All solid sample results reported on a dry weight basis unless otherwise indicated. All LOD's and LOQ's are adjusted for dilutions but not dry weight. Subcontracted results are denoted by SUB in the analyst field.

Authorized Signature

APPENDIX C

TSSA Form 8951 Part B

Part B – To be completed by environmental professional**Submit original Part B to the WDNR along with a copy of Part A****I. TANK-SYSTEM SITE ASSESSMENT (TSSA)**Site Name: Vogue CleanersAddress: 1416 North 4th Street, Milwaukee, Wisconsin

Note: Site name and address must match with Part A Section 1.

To determine if a TSSA is required, see Comm 10 and section II part B of ASSESSMENT AND REPORTING OF SUSPECTED AND OBVIOUS RELEASES FROM UNDERGROUND AND ABOVEGROUND STORAGE TANK SYSTEMS.

If a TSSA is required, then follow the procedures detailed in ASSESSMENT AND REPORTING OF SUSPECTED AND OBVIOUS RELEASES FROM UNDERGROUND AND ABOVEGROUND STORAGE TANK SYSTEMS.

1. Site Informationa. Has there been a previously documented release at this site? Y N

If yes, provide the DSPS # _____, or DNR BRRT's # _____.

b. Number of active tanks¹ at facility prior to completion of current services USTs four (4) ASTs _____.

(NOTE 1: Do not include previously closed systems or system components.)

c. Excavation/trench dimensions (in feet). (Photos must be provided.)

| EXCAVATION/TRENCH # | LENGTH | WIDTH | DEPTH |
|---------------------|---------|---------|---------|
| #1 | 4 feet | 4 feet | 8 feet |
| #2 | 4 feet | 4 feet | 8 feet |
| #3 | 24 feet | 10 feet | 14 feet |
| #4 | 20 feet | 10 feet | 14 feet |
| | | | |
| | | | |
| | | | |

2. Visual Excavation/Trench Inspection (Photos must be provided for "Yes" responses, except item b.)

Do any of the following conditions exist in or about the excavation(s)?

- a. Stained soils: Y N b. Petroleum odor: Y N c. Water in excavation/trench: Y N
 d. Free product in the excavation/trench: Y N e. Sheen or free product on water: Y N

3. Geology/Hydrogeology

- a. Depth to groundwater approx. 14 feet b. Indicate type of geology² fills, clay, sands

(Note 2: Use these symbols individually or in combination as appropriate: C = Clay, SLT = Silt, S = Sand, Gr = Gravel)

4. Receptors

- a. Water supply well(s) within 250 feet of the facility? Y N If yes, specify _____
 b. Surface water(s) within 1000 feet of the facility? Y N If yes, specify _____

5. Sampling

- a. Follow the procedures detailed in ASSESSMENT AND REPORTING OF SUSPECTED AND OBVIOUS RELEASES FROM UNDERGROUND AND ABOVEGROUND STORAGE TANK SYSTEMS.
 b. Complete Tables 1 and 2 as appropriate. (Attach chain-of-custody and laboratory analytical reports.)
 c. Attach a detailed map of site features and sample locations.

J. NOTE RELEVANT OBSERVATIONS, SPECIFIC PROBLEMS OR CONCERNS BELOW

see Table 1 - Soil Analytical Results Summary for complete listing of results as WDRN requested volatile organic compounds be run.

K. TANK-SYSTEM SITE ASSESSMENT INFORMATION

- As a tank-system site assessor certified under Wis. Admin. Code section Comm 5.83, it is my opinion that there is no indication of a release of a regulated substance to the environment.
- Sampling at the site indicates there has been a release to the environment. Pursuant to Wis. Admin. Code section Comm 10.585 (2) (a) and Wis. Stats. section 292.11 (2) (a), the owner or operator or contractor performing work under chapter Comm 10 shall immediately report any release of a regulated substance to the Wisconsin Department of Natural Resources. Failure to do so may result in forfeitures of a minimum of \$10 and a maximum of \$5000 for each violation under Wis. Stats. section 101.09 (5). Each day of continued violation and each tank are treated as separate offenses.

K. TANK-SYSTEM SITE ASSESSMENT INFORMATION

- As a tank-system site assessor certified under Wis. Admin. Code section Comm 5.83, it is my opinion that there is no indication of a release of a regulated substance to the environment.

Sampling at the site indicates there has been a release to the environment. Pursuant to Wis. Admin. Code section Comm 10.585 (2) (a) and Wis. Stats. section 292.11 (2) (a), the owner or operator or contractor performing work under chapter Comm 10 shall immediately report any release of a regulated substance to the Wisconsin Department of Natural Resources. Failure to do so may result in forfeitures of a minimum of \$10 and a maximum of \$5000 for each violation under Wis. Stats. section 101.09 (5). Each day of continued violation and each tank are treated as separate offenses.
