Meeting at Plating	6/20/13

Narrative

Richard attended a meeting at the Phillips Plating facility to discuss access east of the property on the Phillips Plastics property. At the meeting were: Darin and Bob Barrett, Ken Lesza with RET and Dan Anderson with ~~the~~ Phillips Medicine (Plastics). We discussed the site in general and then discussed access ~~the~~ issues. We went over the items that Dan was concerned with and appeared to agree on all issues. We then walked over the property(ies) to look at places for wells. Ownership of Shemrock oil and entrance drive are still in question. Ken will follow up with Dan on the access agreement. I also discussed placement of a piezometer with Ken and Darin. They said they would possibly install one on the next well to site with Drill rig.
