

## Phone Log

May 22, 2018

**Site Name:** F V Steel and Wire Company  
**BRRTS #:** 02-45-560221

**Name:** Shannon Walker, Keystone/F V Steel & Jeff Maletzke, AECOM  
**Phone:** conference call  
**Initiated By:** Walker  
**Time:** 2:00 p.m.

**Subject:** status update on off-site access and property ownership

### Discussion:

Walker scheduled a conference call to update Borski. Walker will contact off-site property owner Mike Gonnering of Affordable Rental & Storage, LLC for continued negotiations on access for installation of PZ-7. Borski discussed the need to delineate the extent of groundwater contamination and identify whether the property is impacted or not but acknowledged the railroad right-of-way and presence of the large building at 825 W Main St with operating businesses pose challenges to placing PZ-7 in the preferred location. All information obtained (e.g., access limitations, geology, vertical profile, contaminant plume concentrations and behavior, etc.) needs to be taken into consideration at the time of closure when drawing groundwater iso-concentration lines and assigning continuing obligations (i.e., entry on GIS Registry for off-site groundwater impacts). AECOM will provide Borski with a map indicating the final agreed upon location of PZ-7 along with a schedule for installation prior to mobilization.

Walker confirmed that the source property was transferred but F V Steel and Wire Company maintains environmental liability. Borski requested Walker provide contact information so a modified responsible party letter can be issued and copied to Walker. Walker intends to provide that information later in the week.

Notes prepared by Jennifer Borski, DNR
