RE: **Request for Site Update**
Former City Services, 10605 West North Avenue, Milwaukee
DNR BRRTS # 03-41-560368 PECFA # 53226-2312-05-A

Dear Mr. Walia:

The Wisconsin Department of Natural Resources (the Department) is requesting information regarding activities associated with petroleum contamination at the site referenced above. You may be aware that as of July 2, 2013, the entire Petroleum Environmental Cleanup Fund Award (PECFA) Program, as well as regulatory oversight of low and medium risk petroleum contamination sites, was transferred to the DNR. Going forward, I will be the project manager for the regulatory oversight as well as the PECFA-funding decisions for this site. Please send all future correspondence to the undersigned at the letterhead address.

According to documents in the file, a *Remedial Investigation Workplan* report was submitted to the Department on July 1, 2013 by your consultant, BLS Environmental, Inc. The report outlines the activities that will be completed to investigate the degree and extent of petroleum contamination at the site.

The Department has not received the final site investigation report. If you have prepared a site investigation report, please provide the report to the Department for review. If a report has not been prepared, please provide an update regarding the progress of the site investigation activities to date.

Your prompt attention to this request is appreciated. If you have any questions, please contact me in writing at the letterhead address, by telephone at (262) 574-2182 or via email at: monica.weis@wisconsin.gov.

Sincerely,

Monica L. Weis
Hydrogeologist
Remediation and Redevelopment Program
