SUBJECT: Facility – Wide Groundwater Monitoring Plan
Enbridge Energy – Superior Terminal Facility Wide
2800 E 21st Street, Superior Wisconsin
DBR BRRTS ID #: 16-16-560657

Dear Mr. Beaster,

The Wisconsin Department of Natural Resources (DNR) has completed a review of the Facility – Wide Groundwater Monitoring Plan Update, prepared and submitted to the DNR on your behalf by Barr Engineering (Barr) and dated March 4, 2021. The DNR received a fee for the review of this document.

Based on the groundwater monitoring results from past monitoring and the information in the above referenced submittal, the DNR approves the proposed change in groundwater monitoring from semiannual to annual. The DNR understands groundwater sampling will be conducted in spring.

The DNR may request additional investigation, monitoring, or remedial action if future groundwater monitoring indicates contamination from discharges of hazardous substances at the Enbridge Terminal has migrated to groundwater. The DNR would utilize the range of options available in Wis. Admin. Code ch. NR140.24, NR140.26, the October 2, 2018 Negotiated Agreement between the DNR and Enbridge Energy, and Wis. Admin. Code ch. NR700-754.

The DNR appreciates the actions Enbridge has taken to monitor groundwater at Enbridge Terminal. Please contact me at (715) 919-7239 or at john.sager@wisconsin.gov if you have any questions concerning this letter.

Sincerely,

John Sager
Hydrogeologist
Remediation and Redevelopment Program
