**Re: Facility-Wide Continuing Obligations Annual Update
Enbridge Energy Superior Terminal, Superior, WI
WDNR BRRTS Activity #: 16-16-560657**

Dear Mr. Sager:

This annual update letter has been prepared on behalf of Enbridge Energy, Limited Partnership (Enbridge), for the above referenced Enbridge Superior Terminal Facility-Wide BRRTS site.

Based on a review of the Enbridge Superior Terminal releases reported in 2022 and the response activities conducted over the past year, no new or historical release sites were identified for transfer to the facility wide BRRTS site in 2022. In addition, based on recent WDNR correspondence, response action activities at existing transfer sites that did not result in documentation of additional residual soil contamination above regulatory criteria (e.g., Manifold 221), have been closed out separately by the WDNR and do not require a formal update or modification to the facility-wide *Continuing Obligations (CO) Package*.

In accordance with the *Negotiated Agreement (NA)* between Enbridge and the Wisconsin Department of Natural Resources (WDNR), the need for updates to the facility-wide *CO Package* will continue to be evaluated and prepared on an annual basis along with any required database fees.

If you have any questions, please contact me at 218-529-7141 or lcarney@barr.com.

Sincerely,

Barr Engineering Company Inc.
