Ron,

I apologize for us not catching this during the normal review. Could we have you adjust a couple more things?

1. On Figure D.2
 - a. Direct Contact Soil Delineation
 - i. Please Add Non-Industrial Direct Contact (NIDC) delineation and proper label for Non-Industrial Direct Contact soil
 - ii. Include the "Gravel" area around G-16 in non-industrial DC delineation
 - iii. Create a separate Industrial Direct Contact delineation around G-15 (be conservative) and label as Industrial Direct Contact soil
 - b. Fix Labels
 - i. There are two "Estimated extent of soil contamination exceeding NR720 GW RCLs" labels (one at top and one on left)
 1. Please remove one of these
 - ii. "Estimated extent of soil contamination exceeding NR720 GW RCLs and/or Direct contact"
 1. Please remove this label
 - c. Remove NR 140 PAL & ES lines and labels
2. On Figure B.2.b
 - a. Regarding the non-industrial direct contact line
 - i. Delineate the direct contact to be more inclusive and uniform in shape instead of jutting down to exclude MW-2 & MW-4.
 - ii. Make one delineation containing both areas of NIDC and label it as such
 - iii. Include the "Gravel" area around G-16 in non-industrial DC delineation
 - iv. Create a separate Industrial Direct Contact delineation around G-15 (be conservative) and label as Industrial Direct Contact soil
 - b. Soil to GW Pathway
 - i. Regarding the delineation for "Estimated extent of petroleum contamination in unsaturated soil exceeding NR720 GW RCLs", must include G-3 (as you have already depicted on D.2)
3. Revise D.1 Description of Maintenance Action(s)
 - a. Description of Contamination section
 - i. Please remove the sentence, "Groundwater contaminated by PVOCs and PAHs is located at a depth of 3-5 feet bgs in the area of the former AST systems."

Thank you Ron, we appreciate your help in making these corrections!!

Sincerely,

Andy

Hey Ron,

We had to request some extra revisions while I was drafting the offsite notification to the railroad as I could not verify the railroad parcel number. I worked with Jason to get everything changed to a non-DOT ROW (which is typically how we handle railroads anyways). All the revisions came in Monday and I have the letter in it's final review. Sorry for the delay but it should all be correct now. Let me know if you have any questions.

Andy

Good morning...

Can you please give me an update on the Final Closure Letter.

The abandonment forms were sent in on 5/29/19.

thanks!! ron
