Subject: Diesel Fuel Release, September 13, 2013
South Plant R11 Pad
333 West 29th Ave, Oshkosh, Wisconsin

Dear Ms. Erdman,

On September 13, 2013, Oshkosh Corporation had a release of diesel fuel. As reported, approximately 100 gallons of diesel fuel was released on a hard packed gravel and clay portion of the Oshkosh South Plant yard located at 333 West 29th Ave., Oshkosh WI, 54903. The spill did not leave the boundaries of the property and was completely contained.

The plant's spill response procedures were initiated immediately upon discovery of the release. Free liquid was recovered using absorbent materials and the impacted gravel was excavated until no visual or olfactory evidence of fuel remained. The area was over excavated the same day (approximately 20 feet by 15 feet by 2 feet deep). The impacted gravel was contained in a roll off container and disposed of at the Waste Management landfill in Berlin, Wisconsin. Used absorbent pads were collected in a drum and sent off site for recycling. Clean gravel was brought to fill in the depression.

Oshkosh Corporation is respectfully requesting full closure of this spill incident. If you have any questions or concerns, please contact Sue Murawski at (920) 233-9582.

Sincerely,

A handwritten signature in cursive script that reads "Sue Murawski".

Sue Murawski, P.E.
