**Attachments:** SKM\_284e15082713590.pdf

Beth,

The spill occurred at ~3:00 pm on August 26<sup>th</sup>. We were pumping oily water from a tank on the ship in the engine room to a double walled oil water tank on the dock. The operator lost track of time and miscalculated to total water in the tank. The tank on the dockwall overflowed. We estimate about 100 gallons spilled out and maybe upwards of 15-25 gallons of oil got into the water. We quickly contained the spill and OSI had a vac truck on site that they used to suck the oil out of the water. That waste goes off site to a treatment facility and the absorbents used go to a waste to energy facility. Let me know if you need any further detail. Thanks

**Subject:** Lubricant Spill

Good Morning Aaron,

Thanks much for the voicemail. If you could please provide a brief email summary, map showing the location of the spill at your facility and also, where the absorbents/boom will be disposed. Much appreciated.

If you have any questions, don't hesitate,

Beth
