Bob,

If you have a minute to review the attached map for the proposed boring locations for the Toy Box/Van Deurzen Cleaners, I would appreciate it. Based on the Phase II ESA that I sent you, the contamination was documented southwest of the building. Based on the topography, and the location of the Fox River, I am assuming that groundwater flow is to the west/northwest. I am planning on drilling on Thursday if you would like to come out to the site?? I would appreciate your input on this. Thanks Bob!
