Carrie, I was preparing for a groundwater monitoring event for the above site and noticed that we are planning to sample for PVOC+Naphthalene. However, we did not include Pb sampling/analysis but wasn't sure if that is what we discussed or if it was just missed. The only well to have a Pb exceedance in the last round was MW-2 (25.9 ppb). Are we okay with no Pb analysis or will you at least want MW-2 analyzed for Pb? If so we will need to have the following approved:

1GS15 Incremental Sample Collection (Lead)	2 x \$26.25 = \$52.50
33 W7 Pb Analysis (Water)	<u>2 x \$12.39 = \$24.78</u>
	<b>Total = \$77.28</b>

If you will want to have Pb analysis in MW-2 only we will need to have the additional \$77.28 approved. A email approval and note in Tracker would be fine with us.

Any questions let me know.  
Thanks,

**Jason Powell**
