Based on the amount of revisions and map changes we would like to request a variance in the amount of \$941.30 (10 hours @ \$94.13/hour).

Also, regarding the Wild Card Bar plume we believe that some of the contamination in PZ-14 near the Pizza Place Restaurant site is likely part of a comingled plume with Wild Card Bar/Davis Auto Body but the figure you provided definitely does not show that. Anyway we will make the edits you have requested.

We will also schedule the abandonment of the Pizza Place wells. According to Ken Shimko the wells labeled PZ-13 and PZ-14 were abandoned.

Any questions let me know.
Thanks,

Jason Powell

Subject: Pizza Place - Closure Packet Revision and MW abandonment

Jason,

As mentioned in our call this morning, the list of requested revisions for the Pizza Place closure packet is attached. One of the revisions that the Closure Committee asked for is related to the groundwater plume shown in Figure B.3.b, and I thought that it may help to see the plume that was

delineated for the Wild Card site. It's not posted on BOTW yet, so I included it as an attachment here.

Also, as we discussed this morning, METCO can proceed with monitoring well abandonment at the Pizza Place site. We will not be sending a Remaining Actions letter pertaining to well abandonment.

As always, please let me know if you have any questions.

Thanks,
Grant
